

Need for transmission system reinforcement in Airdrie area

For more information please contact the AESO at 1-888-866-2959, www.aeso.ca or stakeholder.relations@aeso.ca

Why is transmission system reinforcement needed in the Airdrie area?

Demand for electricity in the Airdrie area continues to grow and transmission system reinforcements to help meet this demand are required. The Alberta Electric System Operator (AESO) has verified the need for transmission system reinforcement in the Airdrie area and has confirmed that electricity demand in this area can be reliably met by upgrading existing transmission lines and adding a new 240 kV substation east of Airdrie.

Who is the AESO?

Alberta's transmission system, sometimes referred to as the Alberta Interconnected Electric System (AIES) or "grid", is planned and operated by the Alberta Electric System Operator (AESO). The transmission system is comprised of the high-voltage lines, towers and equipment (generally 69 kV and above) that transmit electricity from generators to lower voltage systems that distribute it to cities, towns, rural areas and large industrial customers. Our job is to maintain safe, reliable and economic operation of the provincial transmission grid. Our planning responsibility includes identifying needed transmission reinforcement and recommending preferred options to meet these needs. We are regulated by the Alberta Utilities Commission (AUC) and must apply for approval of the transmission system needs we identify. Further, the AESO is also mandated to facilitate the interconnection of qualified electricity generators and new load customers to the provincial transmission grid.

The AESO intends to apply to the AUC for approval of the need identified for transmission reinforcement in the Airdrie area in August 2010.

How is AltaLink Management Ltd. involved?

AltaLink Management Ltd. is the Transmission Facility Owner (TFO) in the Airdrie Area. While the AESO is responsible for determining the need for transmission system reinforcement, AltaLink, when directed by the AESO, is responsible for filing an application with the AUC for approval of the transmission facilities that will satisfy the transmission system reinforcement need identified by the AESO.

The AESO appreciates the views of stakeholders. Your comments and suggestions on the plan for transmission system reinforcement are encouraged. If you have any questions or suggestions regarding the need for transmission system reinforcement in the Airdrie area or the AESO's application regarding this need, please contact:
