

Central East Transfer-Out Project

Helicopter activity near you

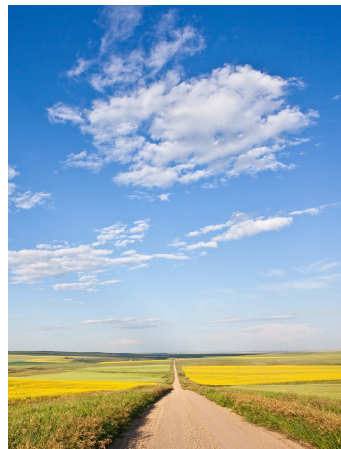

Between April 23 and May 7, AltaLink will be conducting aerial surveys within the study area of the proposed Central East Transfer-Out Project.

These surveys support our environmental field program and allow us to observe and document raptor nests, waterbird colonies, waterfowl and waterbird use to better understand specific environmental features in the area. This information assists us in our ongoing project planning and evaluation. Surveys are completed under Alberta Environment and Parks permits, where required.

When conducting aerial surveys we are mindful of minimizing disruption to residences, area users, livestock and wildlife and we only use approved landing sites and re-fueling locations. The aerial surveys will take place during daylight hours.

If you have any questions or concerns, please contact us at 1-877-267-1453 (toll-free) or stakeholderrelations@altalink.ca.

Thank you for your cooperation.
