
ALTALINK, L.P.

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

MAY 1, 2007

The following Management's Discussion and Analysis (MD&A) is the responsibility of AltaLink, L.P. (AltaLink or the Partnership) management and should be read in conjunction with AltaLink's unaudited interim financial statements for the three months ended March 31, 2007 and 2006, and should also be read in conjunction with the audited financial statements and MD&A included in the Annual Report as at and for the year ended December 31, 2006. The unaudited interim financial statements have been prepared in accordance with Canadian generally accepted accounting principles (GAAP) using the same accounting policies and procedures as those used in preparing the audited annual financial statements for the year ended December 31, 2006, except for the change in accounting policies cited in Note 2 to the interim financial statements, upon the initial adoption of new accounting standards. All tabular amounts in the following MD&A are in millions of dollars unless otherwise noted.

In accordance with its terms of reference, the Audit Committee of the Partnership's Board of Directors reviews the contents of the MD&A and recommends its approval by the Board of Directors. The Board of Directors has approved this MD&A.

Readers should also read the "Forward Looking Information" legal advisory at the end of this MD&A.

OUR BUSINESS

The Partnership's sole focus is owning and operating regulated electricity transmission assets in Alberta and it is the largest transmission owner in the province. We currently own and operate approximately 52% of the transmission lines used in Alberta's high-voltage electricity transmission system, supply approximately 85% of the population of Alberta with transmission services, and we are the principal transmission services provider to most major urban centres in Alberta. The Partnership also owns and operates the interconnection facilities that connect the Alberta network with the transmission system in British Columbia, allowing electricity to flow into and out of Alberta. The Partnership is a regulated electric utility under the jurisdiction of the Alberta Energy and Utilities Board (EUB). The EUB must approve the tariffs charged by Transmission Facility Owners (such as the Partnership). In doing so, the EUB determines the Partnership's revenue requirement, being the revenues required to cover the forecast costs of the transmission business plus an approved return-on-investment on a fixed forward test year basis.

OWNERSHIP

The Partnership's operations are managed by its general partner, AltaLink Management Ltd. (AML or the General Partner). The Partnership has one limited partner, AltaLink Investments, L.P. (AILP). AILP has one limited partner, AltaLink Holdings, L.P. (AHLP). AHLP was formed as a limited partnership under the laws of Alberta pursuant to the provisions of a limited partnership agreement dated February 16, 2005 between AltaLink Investment Management Ltd. (AIML), as general partner, and Macquarie Transmission Alberta Ltd. (Macquarie), SNC-Lavalin Transmission Ltd. (SNC), OTPPB TEP Inc. and 3057246 Nova Scotia Company, as the limited partners of AILP. As part of the formation of AHLP, these limited partners contributed their limited partnership units in AILP to AHLP and were issued the same proportionate limited partnership interests in AHLP as they held in AILP. On June 13, 2006, the EUB approved AltaLink's application to change its ownership structure, and the transaction was completed on June 23, 2006. Under the new ownership structure, SNC-Lavalin Group Inc. indirectly owns 76.92% of

AltaLink, L.P. through its subsidiaries, with Macquarie Transmission Alberta Ltd. owning the remaining 23.08%.

HIGHLIGHTS FIRST QUARTER 2007

- Net income for the quarter of \$11.2 million;
- Year to date capital expenditures include \$29.7 million invested on new build projects directly assigned by the Alberta Electric System Operator (AESO) and \$8.5 million in maintenance capital upgrades;
- In February, 2007, the Partnership received a decision from the EUB regarding the General Tariff Application (GTA) for 2007 and 2008 that it had filed in April, 2006.

RECENT DEVELOPMENTS

Regulatory

On February 16, 2007, the EUB released Decision 2007-012 regarding the Partnership's 2007 and 2008 GTA that it had filed in April, 2006. Such decisions normally require a subsequent filing with the EUB, called a compliance filing, and it was filed with the EUB on March 23, 2007. A final decision from the EUB regarding the Partnership's 2007-2008 GTA compliance filing is expected during the second quarter of 2007.

Financing Activities

On March 29, 2007, the owners injected an additional \$25.0 million of equity capital into the Partnership.

Edmonton to Calgary 500kV Transmission Development

The 500kV development between the Edmonton and Calgary regions is the cornerstone of the expansion required to reinforce Alberta's transmission system. The EUB issued Decision 2005-031 on April 14, 2005 approving the need for the North-South expansion of the Alberta Interconnected Electric System (AIES), more specifically, a new 500kV system between Edmonton and Calgary.

The project includes (i) the construction of a new 500kV transmission line from the Genesee substation (west of Edmonton) to the Langdon substation (southeast of Calgary), and (ii) the conversion (and re-energizing) of the "KEG System" of 240kV lines between the Keephills and Genesee substations (west of Edmonton) and the Ellerslie substation (in South Edmonton) to 500kV. AltaLink owns and operates the transmission line connecting the KEG system, which is a 500kV system currently energized at 240kV that connects generating plants at AltaLink's Keephills substation and Epcor's Genesee substation with AltaLink's Ellerslie substation.

(i) Genesee to Langdon 500kV Transmission Line

In September, 2006, AltaLink finalized its proposed route for the 500kV line development project, having consulted with more than 2,500 landowners, including more than 2,000 discussions and having hosted nine open houses along the project corridor. Based on the current project scope schedule and engineering parameters, the estimated cost of the 330 kilometre project is \$495 million and the cost estimate is expected to be accurate within twenty percent. In a letter dated September 12, 2006, the AESO directly assigned the 500kV line development project to AltaLink. On the same day, AltaLink filed its Permit and Licence application with the EUB for the project.

On October 18, 2006, the EUB adjourned a hearing to consider the Permit and Licence Application for the 500kV transmission line that had been scheduled to begin on December 11, 2006. The adjournment was granted after the EUB received numerous requests from affected landowners to give them more time to prepare for the hearing. The EUB scheduled a public pre-hearing for the project's Permit and Licence application on November 2, 2006, to consider, among other issues: a) the establishment of a list of issues for the hearing; b) the parameters by which standing will be granted to potential intervenors; c) the creation of a schedule which is in keeping with the need established for the 500kV line and the ability of the intervenors to properly participate. On January 16, 2007, the EUB adjourned the hearing to consider these matters until March 12, 2007. On March 13, 2007, the EUB adjourned the hearing to consider motions brought forward by intervenors on procedural matters related to the hearing. On March 16, 2007, the EUB issued its ruling on these matters and the hearing reconvened on April 16, 2007.

Delays in the permit and licence hearing put the project's 2009-2010 winter peak in-service date at risk. While AltaLink is protected against liability from outages, the Partnership remains concerned about its ability to provide continuous electricity service to southern Alberta through the 2009-2010 winter peak.

(ii) KEG Transmission Line Conversion Project

On June 28, 2006, the EUB approved AltaLink's Permit and Licence application for the KEG conversion component of the 500kV project, with an estimated project cost of \$66.3 million.

SELECTED FINANCIAL INFORMATION

| | Three months ended March 31 | |
|---|------------------------------------|-------------|
| | 2007 | 2006 |
| Total revenue (\$millions) | 53.9 | 50.2 |
| Net income (\$millions) | 11.2 | 11.0 |
| Net income per unit (\$) | 0.034 | 0.033 |
| Funds generated from operations (\$millions) | 25.1 | 25.5 |
| Distributions per unit (\$) | 0.016 | 0.015 |
| Total assets (\$millions) | 1,327.9 | 1,205.0 |
| Long-term debt, excluding current portion (\$millions) ¹ | 688.6 | 637.4 |

¹ The long-term debt balance excludes the deferred financing fees, which have been offset against this amount in the financial statements, in accordance with the requirement of the new financial instruments accounting standards.

For the first quarter of 2007, total revenue increased to \$53.9 million compared to \$50.2 million for the same period in 2006. AltaLink revenues primarily consist of tariff revenues as established by the EUB. During the first quarter of 2007, AltaLink received EUB Decision 2007-012, and as a result the 2007 first quarter revenue includes revenue adjustments required by the decisions. Monthly tariff revenue for 2007 has been established at \$17.3 million compared to average monthly tariff revenue of \$16.3 million for 2006.

Depreciation increased to \$15.8 million during the first quarter of 2007 from \$15.0 million during the first quarter of 2006.

Net income for the three months ended March 31, 2007 was \$11.2 million compared to \$11.0 million for the first quarter of 2006.

FINANCIAL POSITION

The following outlines the significant changes in the Partnership's balance sheet from December 31, 2006 to March 31, 2007.

| | Change \$ (millions) | Explanation |
|--|----------------------------|---|
| Restricted Cash | (0.5) | Net reduction of funds received in advance of construction as cash is moved from restricted cash to cash and cash equivalents while projects are under construction. |
| Prepaid expenses and deposits | 11.0 | Increase is due to recognising capital project progress payments made by the Partnership's main engineering services contractor. |
| Property, plant and equipment | 14.1 | Construction costs primarily related to the Terasen projects in Watson Creek and Paddle River. |
| Accounts payable and accrued liabilities | (7.2) | Decrease is mainly in engineering services payable. |
| Other liabilities (current) | (1.7) | Reduction in customer construction funds held on account for customers until construction begins. |
| Long-term debt | (19.9) | Decrease is mainly due to a \$25.0 million equity injection, partially offset by the change in presentation of deferred financing fees due to the implementation of new accounting standards. |

LIQUIDITY AND CAPITAL RESOURCES

| | Three months ended March 31 | |
|---|--|-------------|
| | 2007 | 2006 |
| Cash and cash equivalents, beginning of period | \$ — | \$ — |
| Cash flow from (used in): | | |
| Operating activities | \$ 36.6 | \$ 31.6 |
| Investing activities | (44.7) | (42.4) |
| Financing activities | 8.0 | 10.8 |
| Cash and cash equivalents, end of period | — | — |
| Ratios ¹ | | |
| Interest coverage on debt: | | |
| Income before interest and taxes (EBIT) coverage ^{2,3} | 2.17X | 2.34X |
| Income before interest, taxes, depreciation and amortization (EBITDA) coverage ⁴ | 3.95X | 4.32X |
| Cash flow coverage ⁵ | 2.63X | 3.12X |
| Cash flow/total debt ^{5,6} | 3.65% | 4.00% |
| Debt/ total capitalization ^{6,7} | 60.03% | 62.04% |

1. Funds generated in operations and ratios in this table are non-GAAP financial measures and do not have any standardized meaning prescribed by GAAP and are unlikely to be comparable to similar statistics published by other companies. They are presented since they are commonly referred to by debt holders and other interested parties for their use in analyzing the Partnership's financial position.
2. EBIT Coverage - Income before interest and taxes coverage is equal to net income before financing expense divided by interest.
3. EBITDA Coverage- Income before interest, taxes, depreciation (including accretion) and amortization is equal to net income before financing expenses, depreciation and amortization, divided by interest.
4. Cash flow – Consists of funds generated in operations before changes in non-cash working capital.
5. Interest expense – Interest expense excluding amortization of deferred financing fees on debt.
6. Debt – Consists of short-term and long-term debt, adjusted for the change in presentation of deferred financing fees due to the implementation of the new financial instruments accounting standards.
7. Total Capitalization - Consists of Debt and partner's equity.

Proforma Earnings Coverage

AltaLink's interest requirements, after giving effect to the issue of the \$150.0 million 5.249% notes, amounted to \$37.5 million for the 12 month period ended March 31, 2007. AltaLink's earnings before interest and income tax for the 12 months then ended was \$73.4 million, which is 1.96 times AltaLink's interest requirements for this period.

| | Three months ended March 31 | |
|-----------------------------|--------------------------------|------|
| | 2007 | 2006 |
| Credit ratings | | |
| DBRS – Commercial Paper | R-1 (low) | N/A |
| DBRS – Senior Secured Bonds | A | A |
| S&P – Senior Secured Bonds | A- | A- |

Operating Activities

For the three months ended March 31, 2007, cash from operating activities increased by \$5.0 million compared to the same period in 2006. The period-to-period increase is mainly due to changes in non-cash working capital accounts.

Cash from operations will not be sufficient for the Partnership to fund repayment of existing indebtedness when due or to meet anticipated liquidity, maintenance and other capital expenditure requirements. Therefore, AltaLink anticipates using a combination of additional borrowings under its capital markets platform, internally generated cash flows or equity injections from its limited partner to fund capital expenditures in connection with existing facilities and new construction projects.

Investing Activities

Investing activities included capital expenditures of \$47.9 million in the first quarter of 2007 (three months ended March 31, 2006 - \$37.7 million). Significant projects currently in progress are the Terasen projects in Watson Creek and Paddle River. AltaLink is also continuing its program of capital upgrades and replacements.

Financing Activities

For the three months ended March 31, 2007, cash provided by financing activities decreased by \$2.8 million compared to 2006. The total long-term debt outstanding decreased to \$688.6 million as at March 31, 2007 (December 31, 2006 - \$700.2 million) due to a \$25.0 million equity injection. During the first quarter, restricted cash decreased by \$0.5 million, reducing the balance to \$46.7 million. The \$46.7 million represents cash received from customers in advance of construction, which is shown as restricted cash. These funds will become available for AltaLink's use as approval is received from the customer for expenditures, but no later than when these projects are energized.

SUMMARY OF QUARTERLY FINANCIAL INFORMATION

| Quarter ended | Total Revenue (\$millions) | Net Income (\$millions) | Units Outstanding (millions) | Earnings per Unit (\$/unit) |
|---------------------|----------------------------------|-------------------------------|------------------------------------|-----------------------------------|
| March 31, 2007 | 53.9 | 11.2 | 331.9 | 0.03 |
| December 31, 2006 | 53.7 | 11.0 | 331.9 | 0.03 |
| September 30, 2006 | 48.0 | 6.0 | 331.9 | 0.02 |
| June 30, 2006 | 49.5 | 7.6 | 331.9 | 0.02 |
| March 31, 2006 | 50.2 | 11.0 | 331.9 | 0.03 |
| December 31, 2005 | 47.5 | 10.0 | 331.9 | 0.03 |
| September 30, 2005 | 43.2 | 7.5 | 331.9 | 0.02 |
| June 30, 2005 | 52.8 | 7.9 | 331.9 | 0.02 |
| March 31, 2005 | 53.8 | 11.9 | 331.9 | 0.04 |
| December 31, 2004 * | 29.2 | 5.0 | 331.9 | 0.02 |
| October 31, 2004 | 43.6 | 7.2 | 331.9 | 0.02 |
| July 31, 2004 | 41.7 | 8.8 | 331.9 | 0.03 |

* two month period ended December 31, 2004

Revenue and net income for the quarters ended March and December 31, 2005, 2006 and 2007 were higher than in most of the other quarters, primarily as a result of the allowance for funds used during construction being recorded only in December and January. Adjustments related to the 2002 – 2004 deferral account for direct assigned capital projects were reflected in the December 2005 quarter.

For the eight-month fiscal period ended December 31, 2004, the Partnership operated under an interim tariff, which was lower than the tariff revenue eventually approved in Decision 2005-019 in March 2005. The impact of adjustments arising from EUB Decision 2005-019 resulted in the cumulative effects of the adjustments from the eight-month period being reflected in the quarter ended March 31, 2005.

RELATED PARTY TRANSACTIONS

AltaLink enters into various transactions with its general partner, AML, its limited partner, AILP, AILP's general partner, AIML, and with AILP's limited partner, AHLPL. These transactions are in the normal course of operations and are recorded at the exchange values based on normal commercial rates. The employees that provide administrative and operational services to AltaLink are employed by the General Partner, and the Partnership has indemnified the General Partner for all associated expenses and liabilities.

AltaLink recorded interest expense of \$6.8 million in 2006, the same amount that was paid to AILP for the year ended December 31, 2005, compared to \$4.5 million for the eight-month period ended December 31, 2004 on its \$85.0 million Series 3 Subordinated Bridge Bond. The bond has a repayment date of October 1, 2012, with interest being paid quarterly. As at March 31, 2007, the balance owing in respect of the bond was \$85.0 million, together with accrued interest of \$1.1 million.

At March 31, 2007, AltaLink's payables included \$36.0 million (December 31, 2006 - \$44.3 million) owing to SNC-Lavalin ATP Inc. The amount paid to SNC-Lavalin ATP Inc. for the quarter ended March 31, 2007 was \$24.0 million (year ended December 31, 2006 - \$149.7 million). In 2002, AltaLink executed a ten-year contract with SNC-Lavalin ATP Inc., a subsidiary of SNC-Lavalin Inc., for the provision of engineering, procurement and construction management services for directly assigned capital projects undertaken by AltaLink. The terms and conditions of this contract were reviewed by the EUB and approved in Decision 2003-061 and subsequent decisions. The terms and conditions continue to be subject to regulatory oversight.

CHANGES IN SIGNIFICANT ACCOUNTING POLICIES

Effective January 1, 2007, the Partnership adopted the Canadian Institute of Chartered Accountants Handbook Section 1530, *Comprehensive Income*; Section 3251, *Equity*; Section 3855, *Financial Instruments – Recognition and Measurement*; Section 3861, *Financial Instruments – Disclosure and Presentation* and Section 3865, *Hedges*. The adoption of the new standards resulted in changes in the accounting for financial instruments as well as the recognition of certain transition adjustments that have been recorded in opening retained earnings. The comparative interim financial statements have not been restated. For a description of the principal changes, see Note 2 to the interim financial statements for the quarter ended March 31, 2007.

The Accounting Standards Board has issued an Exposure Draft on Rate-Regulated Operations dated March 2007. AltaLink is currently drafting a response, in conjunction with the Finance and Accounting Committee of the Canadian Electrical Association, concerning the proposals.

OUTLOOK

AltaLink continues its focus on delivering safe, reliable and cost-effective transmission of electricity for the benefit of Albertans.

Regulatory

The Partnership filed its GTA for 2007 and 2008 on April 13, 2006, and the EUB held an oral hearing of the application between September 19 and October 2, 2006. This application requests the EUB to establish the amounts of the monthly tariff to the AESO and the Terms and Conditions of Service by which the AESO will use AltaLink's transmission facilities. On October 3, 2006, the EUB issued Order U2007-253 ordering that the 2007 transmission tariff for AltaLink be continued on an interim and refundable basis until final tariffs for the 2007 and 2008 test years are approved. On February 16, 2007 the EUB released Decision 2007-012 regarding the Partnership's 2007 and 2008 GTA that it had filed in April 2006. Such decisions normally require a subsequent filing with the EUB, called a compliance filing, and it was filed with the EUB on March 23, 2007. A final decision regarding the Partnership's 2007-2008 GTA compliance filing is expected during the second quarter of 2007. AltaLink will continue to be regulated by the EUB on a forward test year cost-of-service basis.

Other applications that AltaLink expects to file with the EUB before the end of the year include:

- Application to dispose of the Direct Assign Capital Deferral Account in relation to the 2004 to 2006 fiscal periods;
- As required by the EUB, on September 29, 2006, AltaLink submitted a projected cost estimate to implement a Uniform System of Accounts and Minimum Filing Requirements (USA-MFR). On March 6, 2007, the EUB issued Decision 2007-017 which approved the adoption of a Uniform System of Accounts and Minimum Filing Requirements (USA-MFR) pertaining to Alberta Electric Utilities determining it to be in the public interest.

On April 11, 2007, the Transmission Regulation was updated to improve the process for developing transmission projects in Alberta. Among its updates, the Transmission Regulation clarifies the roles of both the AESO and the EUB to acknowledge the technical expertise of the AESO and to provide for the streamlining of regulatory approvals for smaller projects and customer interconnections. AltaLink expects that these updates will have a positive effect on the development of transmission projects by further clarifying the roles and responsibilities of industry participants.

In April, 2007 the Government of Alberta announced its intention to introduce legislation in the spring session of the legislature to divide the EUB into two agencies. The Energy Resources Conservation Board will be primarily responsible for oil and natural gas regulation. A second agency, the Alberta Utilities Commission, will be primarily responsible for the oversight of public utilities, including Transmission Facility Owners such as AltaLink.

FORWARD LOOKING INFORMATION

Prospective investors should be aware that this MD&A may contain certain statements or disclosures that constitute forward-looking information under applicable securities laws. All statements and disclosures, other than those of historical fact, which address activities, events, outcomes, results or developments that AltaLink anticipates or expects may or will occur in the future (in whole or in part) should be considered forward-looking information. In some cases, forward-looking information can be identified by terms such as “forecast”, “future”, “may”, “expect”, “anticipate”, “believe”, “potential”, “enable”, “plan”, “continue”, “contemplate”, or other comparable terminology. Forward-looking information presented in such statements or disclosures may, without limitation, relate to applications to the EUB for approval of, among other things, AltaLink’s revenue requirements and deferral and reserve accounts, anticipated income taxes and treatment of costs for applicable test periods, operating expenses, maintenance programs, capital costs and direct assigned projects, capital structure and return on equity, return on rate base, financing plans, interest rates, and short-term borrowing rate; business strategy; plans and objectives of management for future operations; forecast business results; and anticipated financial performance or condition of AltaLink.

Various factors or assumptions are typically applied in drawing conclusions or making the forecasts or projections set out in forward-looking information. These factors and assumptions include, but are not limited to:

- no unforeseen changes in the legislative and operating framework for Alberta’s electricity market (refer to “*ALBERTA’S ELECTRICITY MARKET STRUCTURE*” in AltaLink’s 2006 Annual Information Form (AIF), for example);
- decisions from the EUB concerning outstanding tariff and other applications which are consistent with past regulatory practices and decisions (refer to “*THE TRANSMISSION BUSINESS – Business Strategy; - Revenue Tariffs*” and “*ALBERTA’S ELECTRICITY MARKET STRUCTURE*” in AltaLink’s 2006 AIF, for example);
- no unforeseen changes in rate-of-return and deemed capital structures for AltaLink’s transmission business (refer to “*THE TRANSMISSION BUSINESS – Business Strategy; - Revenue Tariffs*” and “*ALBERTA’S ELECTRICITY MARKET STRUCTURE*” in AltaLink’s 2006 AIF, for example);
- a stable competitive environment; and
- no significant event occurring outside the ordinary course of business such as a natural disaster or other calamity.

These assumptions and factors are based on information currently available to AltaLink including information obtained by AltaLink from first-party industry analysts. In some occurrences, material assumptions and factors are presented or discussed elsewhere herein in connection with the statements or disclosure containing the forward-looking information. AltaLink cautions prospective investors that the foregoing list of material factors and assumptions is not exhaustive.

The forward-looking information in statements or disclosures in this MD&A is based (in whole or in part) upon factors which may cause actual results, performance or achievements of AltaLink to differ materially from those contemplated (whether expressly or by implication) in the forward-looking information. These factors are based on information currently available to AltaLink including information obtained by AltaLink from first-party industry analysts. Actual results may differ materially from those predicted by such forward-looking statements. While AltaLink does not know what impact any of these differences may have, its business, results of operations, financial condition and its credit stability may be materially adversely affected. Factors that could cause actual results or outcomes to differ materially from the results expressed or implied by forward-looking statements include, among other things:

- the risks associated with being subject to extensive regulation including risks associated with EUB action or inaction;
- the risk that AltaLink is not able to arrange sufficient cost effective financing to repay maturing debt and to fund capital expenditures, dividends and other obligations;
- the risks to our facilities posed by severe weather, other natural disasters or catastrophic events and AltaLink's limited insurance coverage for losses resulting from these events;
- the potential for service disruptions and increased costs if AltaLink fails to maintain and improve its aging asset base; and
- the risks associated with forecasting AltaLink's revenue requirements and the possibility that AltaLink could incur operational, maintenance and administrative costs above those included in AltaLink's approved revenue requirement.

AltaLink cautions prospective investors that the above list of factors is not exhaustive. Other factors which could cause actual results, performance or achievements of AltaLink to differ materially from those contemplated (whether expressly or by implication) in the forward-looking statements or other forward-looking information are disclosed in AltaLink's publicly filed disclosure documents, including those disclosed under the heading "*RISK FACTORS*" in AltaLink's annual information form for the year ended December 31, 2006. Risk factors that could lead to such differences include, without limitation, legislative and regulatory developments that could affect costs or revenues, the speed and degree of competition entering the market, global capital markets activity, timing and extent of changes in prevailing interest rates, currency exchange rates, inflation levels and general economic conditions in geographic areas where AltaLink operates, results of financing efforts, changes in counterparty risk and the impact of accounting standards issued by Canadian standard setters.

All forward-looking information herein is given as of May 1, 2007. AltaLink is not obligated to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as required by applicable laws. Because of these risks, uncertainties and assumptions, prospective investors should not place undue reliance on these forward-looking statements. **Any forward-looking information contained herein is expressly qualified by this statement.**

ADDITIONAL INFORMATION

Additional information relating to AltaLink, including the Partnership's AIF, is available on SEDAR at www.sedar.com.
