Southwest Calgary Ring Road Transmission Project
RE: Construction update

As part of the Southwest Calgary Ring Road Transmission Project, AltaLink began construction in May 2017 to relocate a portion of a transmission line underground along 37 Street SW. As we outlined in our original schedule, construction work on 37 Street SW was scheduled to be completed in October 2017.

On Tuesday, October 17, 2017, AltaLink completed the majority of construction on 37 Street SW and two way traffic was re-opened to the community of Lakeview. Thank you for your patience and cooperation over the last six months and we apologize for any inconveniences that occurred during construction.

AltaLink expects to complete the remaining scope of work for the project by the end of the year at which time the project will be in service. We will continue to work along the green spaces located on the west side of 37 Street SW and south side of 66 Avenue SW from now until then. Salvage and reclamation activities will take place in the new year. There will be minor intermittent traffic disruptions and parking restrictions for short periods of time in order to allow us to complete the remainder of our work safely.

We anticipate the majority of the remaining work will not affect the majority of Lakeview residents and we will work with residents to inform them of upcoming activities and potential impacts.

AltaLink remains committed to trying to minimize the time spent on construction in your community. Thank you again for your assistance in allowing us to complete our work safely.

If you have any questions, please contact stakeholderrelations@altalink.ca or 1-877-267-1453.

Sincerely,

Dave Lee
Manager, Consultation
