## **ATCO Power Heartland Generating Station Interconnection Project Cancellation**

Thank you for your participation in the ATCO Heartland Connection Project. You may have received information regarding this project in September 2014, February 2015, December 2015, October 2016 and/or May 2017. The Alberta Utilities Commission approved this project for construction on February 7, 2018.

This letter is to inform you that on May 24, 2019 the Alberta Electric System Operator (AESO) cancelled ATCO Power's request for system access service and the interconnection project has been cancelled. If you have questions about the cancelled request for system access service please contact the AESO at 1-888-866-2959 or at [stakeholder.relations@aeso.ca](mailto:stakeholder.relations@aeso.ca).

In addition, if you have questions for ATCO Power about the project cancellation, please contact them at 403-209-6951, or at [heartland@atcopower.com](mailto:heartland@atcopower.com).

### **Project background**

The ATCO Power Heartland Generating Station Interconnection was intended to connect ATCO Power's approved Heartland Generating Station to the electric system. The project involved constructing one single-circuit 240 kV (kilovolt) transmission line (to be named 1181L), approximately 5.5 kilometres long, to connect the approved substation at the ATCO Power Heartland Generating Station (to be named Lamont 400S) to the existing Josephburg Substation. The project also involved substation upgrades at the existing Josephburg Substation.

### **Contact us**

We are available to address any questions or concerns you may have. Please contact us at [stakeholderrelations@altalink.ca](mailto:stakeholderrelations@altalink.ca) or 1-877-267-1453. You can also view more information about the project at <http://www.altalink.ca/projects/view/21/atco-power-heartland-generating-station-interconnection>.

Sincerely,

Dave Lee  
Manager, Consultation
