New Anthony Henday Substation Notice of application filing

Thank you for your ongoing participation in the Anthony Henday Substation project. We submitted an application for the project to the Alberta Utilities Commission (AUC) on December 9, 2016.

Project update

During the final round of consultation, field surveying was completed to confirm the location of existing assets. Based on the survey results, AltaLink decided to shift the proposed substation location southeast. This shift reduces the length of the proposed fibre optic cable connection from 100 metres to 72 metres.

AltaLink does not expect this change to the project to create any additional impacts to stakeholders. However, we are available to address any questions or concerns you may have and can be reached via the contact information provided at the end of this letter.

Next steps

The AUC will review the application and can approve, approve with conditions or deny the project. The AUC may also host a hearing regarding the project. To learn more about the AUC process and how you can become involved please visit www.auc.ab.ca.

We will notify you of the AUC's decision regarding the project. If the project is approved, construction activities could begin in September 2018 and will take approximately six months to complete.

If the project is approved, you may see or hear the following during the construction process:

- noise and construction crews
- transmission structure construction
- wire stringing activities
- substation construction activities

The application

The application can be viewed on the AUC's website at www.auc.ab.ca.

To access the application, click on the 'eFiling System Login' button on the left side of the page and log in to your eFiling account. If you do not have an account, select 'New Account' and follow the steps onscreen. Please note any questions or concerns regarding account creation and management should be directed towards the AUC at info@auc.ab.ca.

Once your account has been created and you have successfully logged in, enter “22244” into the ‘Go to...’ search bar on the left side of the page to locate the application. Alternatively, you can navigate to ‘Find’, click ‘Proceedings’ and enter “Henday” into the ‘Description’ search bar.

If you have any issues accessing the application, please contact us at the details below and we will mail a copy of the application to you.

Project background

AltaLink is proposing to build a new substation located at the Kinder Morgan Canada East Edmonton Terminal (SW-5-53-23-W4M) near the intersection of Baseline Road (101 Ave) and 17 Street in Sherwood Park, Strathcona County. This project includes:

- two new 138/25 kV transformers
- two new 138 kV circuit breakers
- one new control building
- approximately 55 metres of 138 kV transmission line
- approximately 72 metres of underground fibre optic cable for communication purposes
- a fenced area of approximately 33 by 35 metres

Contact us

AltaLink is available to gather any further input you have or address any questions or concerns. Please contact us at stakeholderrelations@altalink.ca or 1-877-267-1453. Further information about this project and maps are available at: <http://www.altalink.ca/projects/view/233/new-anthony-henday-substation>

Sincerely,

Dave Lee
