Irma Wind Power Project Connection Cancellation

Thank you for your participation in the Irma Wind Power Project. You may have received information regarding this project in August 2016 and/or January 2017.

This letter is to inform you that the system access service request for the Irma Wind Power Project Connection has been cancelled. On August 8, 2019, the Alberta Utilities Commission approved the AESO's request to withdraw its Needs Identification Document application and AltaLink's request to withdraw its facility application.

If you have questions about the project cancellation, please contact the AESO at 1-888-866-2959 or at stakeholder.relations@aeso.ca.

Project background

Irma Wind Farm Ltd. had requested a connection to the transmission system for their proposed wind power project. AltaLink was proposing to construct a transmission line, operated and maintained by AltaLink, to connect Irma Wind's potential Kinsella Substation to AltaLink's Buffalo Creek Substation. We were proposing to build approximately 10 to 16 kilometres of 138 kilovolt (kV) transmission line.

Contact us

We are available to address any questions or concerns you may have. Please contact us at stakeholderrelations@altalink.ca or 1-877-267-1453. You can also view more information about the project at <http://www.altalink.ca/projects/view/250/irma-wind-power-project-connection>

Sincerely,

Dave Lee
Manager, Consultation
