**50L Transmission Line Modification:
Stage one cancellation**

Thank you for your ongoing participation in the 50L Transmission Line Modification project. There have been changes to the project since we mailed information to stakeholders in November 2016 and we want to provide you with an update.

Stage one cancellation: Transmission line height increase

AltaLink will not require the five proposed taller, temporary structures to safely complete groundwork in preparation for Shape Properties' commercial and residential development. As a result, we will not be installing temporary structures.

Stage two: Transmission line relocation

Stage two of the project is still required and is anticipated to begin in the fall of 2017. This stage of the project will include permanently relocating the portion of the 50L transmission line that was proposed to be raised prior to the stage one cancellation. Information regarding stage two will be mailed to affected stakeholders in spring 2017.

Project background

The proposed project is located in the city of Calgary, south of Highway 1 and approximately 1.5 kilometres west of Canada Olympic Park. Shape Properties has requested that a portion of an existing transmission line be moved to accommodate future commercial and residential development.

Contact us

We are available to address any questions or concerns that you may have. Please contact us at stakeholderrelations@altalink.ca or 1-877-267-1453. For previous project information, please visit www.altalink.ca/projects.

If you would like more information regarding Shape Properties, please contact info@shapeproperties.com or 604-681-2358.

Sincerely,

Dave Lee
Manager, Consultation
