

**How to read your map**

This double sided map will help you to locate your property in relation to the proposed route options. The side titled Detailed Base highlights routing considerations such as residence, irrigated parcels and environmentally significant areas. The side titled Detailed Photo is an aerial photo and provides landscape details.

The map shows:

- Preferred Route in red
- Alternate Route in green
- Alternate Variant Route in purple
- Proposed RES wind farm substation as a red and yellow square
- Proposed upgrade to an existing substation as a green square
- Route no longer under consideration in grey dashes

The black dots and corresponding letter and number (for example, A15) will help you identify the mosaic segment you are closest to. Please also refer to the Strip Mosaic map(s) in this package for an aerial photo of your property in relation to the proposed transmission line routes and substation location.

**Although there are many proposed route locations on the map, if the project is approved by the Alberta Utilities Commission, only one route from the existing Whitla Substation to the RES Forty Mile 516S Substation will be constructed.**

LEGEND	
● Point Designation	■ Study Area
■ Proposed Upgrade to Existing Substation	○ Communication Tower
■ Preferred Transmission Line	○ Hamlet or Locality
■ Alternate Transmission Line	○ Wellsite
■ Alternate Variant Transmission Line	○ River or Stream
--- Routes no longer under consideration	○ Road
--- Existing Transmission Line	○ Water Body
■ Proposed RES Forty Mile 516S Substation	■ Irrigated Parcel
■ Previously Considered RES Forty Mile 516S Substation	■ Water Body
	■ Other AltaLink Project
	■ Proposed Preferred Suncor Forty Mile Transmission Line
	■ Proposed Alternate Suncor Forty Mile Transmission Line
	■ Proposed Suncor Maleb Substation
	■ Gravel Pit
