Suncor Forty Mile Wind Power Project Connection

Notice of application filing

Thank you for your ongoing participation in the Suncor Forty Mile Wind Power Project. We submitted an application for the project to the Alberta Utilities Commission (AUC) on December 11, 2018.

Next steps

The AUC will review the application and can approve, approve with conditions or deny the project. The AUC may also host a hearing regarding the project. To learn more about the AUC process and how you can become involved please visit www.auc.ab.ca.

We will notify you of the AUC's decision regarding the project. If the project is approved, you may see or hear the following during the construction process:

- Noise and construction crews
- Transmission structure construction
- Wire stringing on the transmission structures
- Work at the Whitla 251S Substation

Where construction activities are required to take place on private property, we will contact you in advance to discuss the specific dates and times we will require access to your property.

The application

The application can be viewed on the AUC's website at www.auc.ab.ca.

To access the application, click on the 'eFiling System Login' button on the top of the page and log in to your eFiling account. If you do not have an account, select 'New Account' and follow the steps onscreen. Please note any questions or concerns regarding account creation and management should be directed towards the AUC at info@auc.ab.ca.

Once your account has been created and you have successfully logged in, please enter Filing number 24123 in the 'Go to...' search bar at the top of the page to locate the application. Alternatively, you can navigate to 'Find,' click 'Proceedings' and enter "Suncor Forty" into the 'Description' search bar.

If you have any issues accessing the application, please contact us at the details below and we will mail a copy of the application to you.

Project background

The Project consists of constructing approximately 2.5 kilometres of new 240 kilovolt (kV) transmission line (1129L) from the existing Whitla 251S Substation to Forty Mile Granlea Wind GP Inc.'s Maleb 530S Substation. Optical ground wire (OPGW) will be installed along the new transmission line, and may be installed as part of the overhead shield wire or be buried within the right-of-way. A new 240 kV circuit breaker and other associated equipment will be required at the Whitla Substation, which will not require any modifications to the existing substation layout.

The proposed single circuit 240 kV transmission structures will:

- be steel H-frame (two pole) and three pole structures
- be approximately 17 to 25 metres tall
- have a distance between structures of approximately 160 metres
- have a right-of-way approximately 30 metres wide on private property

Contact us

We are available to address any questions or concerns you may have. Please contact us at stakeholderrelations@altalink.ca or 1-877-267-1453. Further information about this project and maps are available at <http://www.altalink.ca/projects/view/259/suncor-forty-mile-wind-power-project-connection>.

Sincerely,

Dave Lee
Manager, Stakeholder Engagement
