**Stirling Wind Project Connection:
Notice of application filing**

Thank you for your ongoing participation in the Stirling Wind Project Connection. We submitted an application for the project to the Alberta Utilities Commission (AUC) on December 13, 2017.

Next steps

The AUC will review the application and can approve, approve with conditions or deny the project. The AUC may also host a hearing regarding the project. To learn more about the AUC process and how you can become involved please visit www.auc.ab.ca.

We will notify you of the AUC's decision regarding the project. If the project is approved, construction activities could begin in spring 2019 and will take approximately four months to complete.

Where construction activities are required to take place on private property, we will contact you in advance to discuss the specific dates and times we will require access to your property.

If the project is approved, you may see or hear the following during the construction process:

- noise and construction crews
- transmission structure construction
- wire stringing activities

The application

The application can be viewed on the AUC's website at www.auc.ab.ca.

To access the application, click on the 'eFiling System Login' button on the left side of the page and log in to your eFiling account. If you do not have an account, select 'New Account' and follow the steps onscreen. Please note any questions or concerns regarding account creation and management should be directed towards the AUC at info@auc.ab.ca.

Once your account has been created and you have successfully logged in, enter 23196 into the 'Go to...' search bar on the left side of the page to locate the application. Alternatively, you can navigate to 'Find', click 'Proceedings' and enter "Stirling Wind" into the 'Description' search bar.

If you have any issues accessing the application, please contact us at the details below and we will mail a copy of the application to you.

Project details

We are proposing to build approximately five to seven kilometres of 138 kilovolt (kV) transmission line to connect Stirling Wind Project's Red Coat Substation to the electric system. The final transmission line length is dependent on the final route selected, and approved, by the AUC.

Contact us

AltaLink is available to gather any further input you have or address any questions or concerns. Please contact us at stakeholderrelations@altalink.ca or 1-877-267-1453. Further information about this project and maps are available at www.altalink.ca/projects.

Sincerely,

Dave Lee
Manager, Consultation
