### **Heritage Wind Energy Centre Connection Cancellation**

Thank you for your participation in the Heritage Wind Energy Centre Connection. You may have received information regarding this project in August 2017.

This letter is to inform you that on July 8, 2019 the Alberta Electric System Operator (AESO) cancelled NextEra Canada Development & Acquisitions Inc.'s (NextEra) request for system access service and the connection project has been cancelled. If you have questions about the project cancellation, please contact the AESO at 1-888-866-2959 or at [stakeholder.relations@aeso.ca](mailto:stakeholder.relations@aeso.ca).

### **Project background**

NextEra requested a connection to the transmission system for their wind energy project, Heritage Wind Energy Centre (HWEC). AltaLink was proposing to construct a transmission line, operated and maintained by AltaLink, to connect the facility to the electric system.

The project involved constructing approximately 210 metres of new 240 kV transmission line to connect NextEra's planned Heritage Hill 110S Substation, which is part of the HWEC, to AltaLink's Fidler Substation. AltaLink was also proposing to add one new 240 kV circuit breaker to the Fidler Substation to accommodate the new connection and to install a new telecommunications cable between the planned Heritage Hill 110S Substation and Fidler Substation.

### **Contact us**

We are available to address any questions or concerns you may have. Please contact us at [stakeholderrelations@altalink.ca](mailto:stakeholderrelations@altalink.ca) or 1-877-267-1453. You can also view more information about the project at <http://www.altalink.ca/projects/view/276/heritage-wind-energy-centre-connection>.

Sincerely,

Dave Lee  
Manager, Consultation
