## **786L Transmission Line Relocation Notice of Project Approval**

Thank you for your ongoing participation in the 786L Transmission Line Relocation project. The Alberta Utilities Commission (AUC) approved this project for construction on November 19, 2018.

### **Next steps**

We plan to begin construction in July 2019, and anticipate it will take approximately three months to complete. AltaLink is restricted to undertaking construction within the months of July, August and September. Any remaining work not completed in the summer of 2019 will be completed between July and September 2020.

Where construction activities are required to take place on private property, we will contact you in advance to discuss the specific dates and times we will require access to your property.

Depending on where you are in relation to the project, you may see or hear:

- noise and construction crews
- transmission structure construction
- wire stringing on the transmission structures
- salvage of existing structures and conductor removal.

### **AUC approval**

When the AUC approves a transmission project, it grants AltaLink Permits and Licences. The Permits and Licences for this project can be viewed on the AUC website at:

<https://www2.auc.ab.ca/Proceeding23460/SitePages/Home.aspx>

To view the above link, you will need to log in to your eFiling account. If you do not have an account, select 'New Account' in the Login box and follow the steps onscreen. Please note that any questions or concerns regarding account creation and management should be directed towards the AUC at [info@auc.ab.ca](mailto:info@auc.ab.ca).

If you have any issues accessing these Permits and Licences, please contact us at the details below and we will mail copies of the documents to you.

### **Project background**

AltaLink will relocate 1.5 kilometres of the 786L line in the Municipality of Crowsnest Pass. This section of transmission line has reached the end of its life cycle and must be rebuilt. In addition, relocating the line from steep terrain to flatter ground parallel to an existing road will provide a safer and more accessible location for future maintenance activities.

### **Contact us**

We are available to address any questions or concerns you may have. Please contact us at [stakeholderrelations@altalink.ca](mailto:stakeholderrelations@altalink.ca) or 1-877-267-1453. Further information about this project and maps are available on the AltaLink website at <http://www.altalink.ca/projects/view/279/786l-line-relocation>.

Sincerely,

Dave Lee  
Manager, Stakeholder Engagement
