Suncor Granlea Connection Project Notice of application filing

Thank you for your ongoing participation in the Suncor Granlea Connection Project. We submitted an application for the project to the Alberta Utilities Commission (AUC) on December 10, 2018.

Next steps

The AUC will review the application and can approve, approve with conditions or deny the project. The AUC may also host a hearing regarding the project. To learn more about the AUC process and how you can become involved please visit www.auc.ab.ca.

We will notify you of the AUC's decision regarding the project. If the project is approved, you may see or hear the following during the construction process:

- Noise and construction crews
- Transmission structure construction
- Wire stringing on the transmission structures

Where construction activities are required to take place on private property, we will contact you in advance to discuss the specific dates and times we will require access to your property.

The application

The application can be viewed on the AUC's website at www.auc.ab.ca.

To access the application, click on the 'eFiling System Login' button on the top of the page and log in to your eFiling account. If you do not have an account, select 'New Account' and follow the steps onscreen. Please note any questions or concerns regarding account creation and management should be directed towards the AUC at info@auc.ab.ca.

Once your account has been created and you have successfully logged in, enter Filing number 24120 into the 'Go to...' search bar on the top of the page to locate the application. Alternatively, you can navigate to 'Find,' click 'Proceedings' and enter "Granlea" into the 'Description' search bar.

If you have any issues accessing the application, please contact us at the details below and we will mail a copy of the application to you.

Project background

The Project involves constructing approximately 230 metres of new transmission line to connect Forty Mile Granlea Wind GP Inc.'s proposed Granlea Substation to AltaLink's existing 240 kilovolt (kV) 964L transmission line. The new line will:

- be mono-pole, three pole or other steel pole structures, and may use guy wires and anchors as supports;
- be single-circuit;
- be approximately 20 to 35 metres tall; and
- have a right-of-way width of approximately 30 metres.

AltaLink will also install a new underground fibre optic telecommunications cable. The cable will be buried in the transmission right-of-way and will be approximately 230 metres long. The fibre optic cable will allow us to communicate more effectively by providing our control centres with valuable data that will be used to maintain the reliability of Alberta's electric system.

Contact us

We are available to address any questions or concerns you may have. Please contact us at stakeholderrelations@altalink.ca or 1-877-267-1453. Further information about this project and maps are available at: <http://www.altalink.ca/projects/view/283/suncor-granlea-connection-project>.

Sincerely,

Dave Lee
Manager, Stakeholder Engagement
