Vulcan-Stavely Area Capacity and Reliability Upgrade Notice of application filing

Thank you for your ongoing participation in the Fortis Vulcan-Stavely Area Capacity and Reliability Upgrade project. We submitted an application for the project to the Alberta Utilities Commission (AUC) on March 8, 2018.

Next steps

The AUC will review the application and can approve, approve with conditions or deny the project. The AUC may also host a hearing regarding the project. To learn more about the AUC process and how you can become involved please visit www.auc.ab.ca.

We will notify you of the AUC's decision regarding the project. If the project is approved, construction activities could begin in May 2018 and will take approximately seven months to complete.

Where construction activities are required to take place on private property, we will contact you in advance to discuss the specific dates and times we will require access to your property.

If the project is approved, you may see or hear the following during the construction process:

- noise and construction crews
- substation construction activities
- fence construction activities

The application

The application can be viewed on the AUC's website at www.auc.ab.ca.

To access the application, click on the 'eFiling System Login' button on the left side of the page and log in to your eFiling account. If you do not have an account, select 'New Account' and follow the steps onscreen. Please note any questions or concerns regarding account creation and management should be directed towards the AUC at info@auc.ab.ca.

Once your account has been created and you have successfully logged in, enter 23396 into the 'Go to...' search bar on the left side of the page to locate the application. Alternatively, you can navigate to 'Find', click 'Proceedings' and enter "Fortis Vulcan-Stavely" into the 'Description' search bar.

If you have any issues accessing the application, please contact us at the details below and we will mail a copy of the application to you.

Project details

The project involves equipment upgrades at the existing Vulcan and Stavely substations.

Vulcan Substation

The Vulcan substation is located approximately three kilometers south of the Town of Vulcan and involves:

- salvaging one 25 kV circuit breaker
- adding one new 138 kV circuit breaker, one 138/25 kV transformer and one new switchgear building containing four (4) 25kV circuit breakers
- expanding the fence line to the north of the substation

Stavely Substation

The Stavely Substation is approximately two kilometres east of the Town of Stavely. AltaLink is proposing to add one 25 kV circuit breaker to the substation.

Contact us

AltaLink is available to gather any further input you have or address any questions or concerns. Please contact us at stakeholderrelations@altalink.ca or 1-877-267-1453.

Further information about this project and maps are available at: <http://www.altalink.ca/projects>.

Sincerely,

Dave Lee
Manager, Consultation
