Inter Pipeline Strathcona Cogeneration Facility Connection Notice of application filing

Thank you for your ongoing participation in the Inter Pipeline Strathcona Cogeneration Facility Connection. We submitted an application for the project to the Alberta Utilities Commission (AUC) on December 18, 2018.

Next steps

The AUC will review the application and can approve, approve with conditions or deny the project. The AUC may also host a hearing regarding the project. To learn more about the AUC process and how you can become involved, please visit www.auc.ab.ca.

Where construction activities are required to take place on private property, we will contact you in advance to discuss the specific dates and times we will require access to your property.

The application

The application can be viewed on the AUC's website at www.auc.ab.ca.

To access the application, click on the 'eFiling System Login' button on the top of the page and log in to your eFiling account. If you do not have an account, select 'New Account' and follow the steps onscreen. Please note that any questions or concerns regarding account creation and management should be directed towards the AUC at info@auc.ab.ca.

Once your account has been created and you have successfully logged in, enter 24062 into the 'Go to...' search bar on the top of the page to locate the application. Alternatively, you can navigate to 'Find', click 'Proceedings' and enter "Strathcona" into the 'Description' search bar.

If you have any issues accessing the application, please contact us at the details below and we will mail a copy of the application to you.

Project background

The project involves building a new switching substation that will be called Ursus Substation, and two single circuit 240 kilovolt (kV) transmission lines.

The proposed Ursus Substation will:

- include four 240 kV circuit breakers, associated equipment and a control building
- be located on Inter Pipeline property within a fenced area of approximately 112 by 75 metres
- be connected to Inter Pipeline's Central Utility Block Substation via a short overhead bus connection.

To connect the proposed Ursus Substation to the electric system, Altalink is proposing to modify the 997L line, which is the south portion of the adjacent 942L/997L double circuit transmission line. A section of the 997L transmission line will be salvaged and the remaining portion of the existing transmission line to the east will be renamed 1027L. The proposed 997L and 1027L lines will both be connected to the proposed Ursus Substation, each using new sections of transmission line approximately 120 to 140 metres in length.

In addition, AltaLink is also proposing to install optical ground wire (OPGW) on the existing transmission line between the proposed Ursus Substation and the existing Josephburg Substation for protection and telecommunications purposes.

Contact us

We are available to address any questions or concerns you may have. Please contact us at stakeholderrelations@altalink.ca or 1-877-267-1453. Further information about this project and maps are available at <http://www.altalink.ca/projects/view/302/inter-pipeline-strathcona-cogeneration-facility-connection>.

Sincerely,

Dave Lee
