## **14S Devon Radio Telecommunications Tower Replacement Notice of application filing**

Thank you for your ongoing participation in the 14S Devon Radio Telecommunications Tower Replacement project. We submitted an application for the project to the Alberta Utilities Commission (AUC) on April 15, 2019.

### **Next steps**

The AUC will review the application and can approve, approve with conditions or deny the project. The AUC may also host a hearing regarding the project. To learn more about the AUC process and how you can become involved, please visit [www.auc.ab.ca](http://www.auc.ab.ca).

The proposed project will occur on AltaLink-leased land. No fence line expansion or temporary workspace will be required.

If the project is approved, construction is expected to begin in June 2019.

### **The application**

The application can be viewed on the AUC's website at [www.auc.ab.ca](http://www.auc.ab.ca).

To access the application, click on the 'eFiling System Login' button on the top of the page and log in to your eFiling account. If you do not have an account, select 'New Account' and follow the steps onscreen. Please note any questions or concerns regarding account creation and management should be directed towards the AUC at [info@auc.ab.ca](mailto:info@auc.ab.ca).

Once your account has been created and you have successfully logged in, enter Filing number 24510 into the 'Go to...' search bar on the top of the page to locate the application. Alternatively, you can navigate to 'Find', click 'Proceedings' and enter "Devon 14S" into the 'Description' search bar.

If you have any issues accessing the application, please contact us at the details below and we will mail a copy of the application to you.

### **Project background**

The proposed project involves replacing the existing telecommunications tower at the Devon Substation with a new, taller tower. The project is located on the east side of the Town of Devon, in SE 34-50-26-W4.

The existing telecommunications tower is a wood pole, approximately 16.5 metres tall. The tower was constructed in 1975 and has been chosen for replacement due to its age. The proposed replacement tower:

- will be approximately 41 metres tall including lightning rod
- will be a self-supported steel lattice structure

- will have a triangular base with each side measuring approximately 1.7 metres
- may be painted and have lighting to comply with Transport Canada's requirements
- will support a combination of antennas similar to the existing configuration

**Contact us**

We are available to address any questions or concerns you may have. Please contact us at [stakeholderrelations@altalink.ca](mailto:stakeholderrelations@altalink.ca) or 1-877-267-1453. Further information about this project and maps are available at:
