## **Greengate Travers Solar Connection Project Notice of application filing**

Thank you for your ongoing participation in the Greengate Travers Solar Connection project. We submitted an application for the project to the Alberta Utilities Commission (AUC) on August 29, 2019.

### **Next steps**

The AUC will review the application and can approve with conditions or deny the project. The AUC may also host a hearing regarding the project. To learn more about the AUC process and how you can become involved please visit [www.auc.ab.ca](http://www.auc.ab.ca).

Where construction activities are required to take place on private property, we will contact you in advance to discuss the specific dates and times we will require access to your property.

### **The application**

The application can be viewed on the AUC's website at [www.auc.ab.ca](http://www.auc.ab.ca).

To access the application, click on the 'eFiling System Login' button on the top of the page and log in to your eFiling account. If you do not have an account, select 'New Account' and follow the steps onscreen. Please note any questions or concerns regarding account creation and management should be directed towards the AUC at [info@auc.ab.ca](mailto:info@auc.ab.ca)

Once your account has been created and you have successfully logged in, enter 24848 into the 'Go to...' search bar on the top of the page to locate the application. Alternatively, you can navigate to 'Find', click 'Proceedings' and enter "Greengate" into the 'Description' search bar.

If you have any issues accessing the application, please contact us at the details below and we will mail a copy of the application to you.

### **Project background**

AltaLink is proposing to connect Greengate's proposed transmission line to the electric system by connecting it to AltaLink's existing 1005L transmission line. The proposed project involves modifying the 1005L circuit, which forms part of AltaLink's existing 240 kilovolt (kV) double circuit 1005L/1036L transmission line. The modifications include rebuilding approximately 40 metres of the existing 1005L transmission line and installing three new structures on the existing 1005L/1036L transmission line.

AltaLink is also proposing to install a telecommunications tower at Greengate's Little Bow Substation.

**Project update**

AltaLink previously informed stakeholders that the proposed modifications to the existing 1005L transmission line would consist of installing two new structures. Upon further detailed engineering, AltaLink determined that an additional structure will be required on the 1036L circuit of the double circuit 1005/1036L transmission line and AltaLink has applied to the AUC for this additional structure.

**Contact us**

We are available to address any questions or concerns you may have. Please contact us at [stakeholderrelations@altalink.ca](mailto:stakeholderrelations@altalink.ca) or 1-877-267-1453. Further information and maps about this project are available at <http://www.altalink.ca/projects/view/317/travers-solar-connection-project>

Sincerely,

Dave Lee  
Manager, Stakeholder Engagement
