Clyde 150S Substation Expansion Notice of application filing

Thank you for your ongoing participation in the Clyde 150S Substation Expansion. We submitted an application for the project to the Alberta Utilities Commission (AUC) on July 2, 2019.

Next steps

The AUC will review the application and can approve, approve with conditions or deny the project. The AUC may also host a hearing regarding the project. To learn more about the AUC process and how you can become involved please visit www.auc.ab.ca.

The application

The application can be viewed on the AUC's website at www.auc.ab.ca.

To access the application, click on the 'eFiling System Login' button on the top of the page and log in to your eFiling account. If you do not have an account, select 'New Account' and follow the steps onscreen. Please note any questions or concerns regarding account creation and management should be directed towards the AUC at info@auc.ab.ca

Once your account has been created and you have successfully logged in, type 24702 into the 'Go to...' search bar on the top of the page to locate the application. Alternatively, you can navigate to 'Find', click 'Proceedings' and enter "Clyde" into the 'Description' search bar.

If you have any issues accessing the application, please contact us at the details below and we will mail a copy of the application to you.

Project background

The proposed project involves equipment upgrades at the existing Clyde 150S Substation in SW-36-59-25 W4M, just outside of the Village of Clyde in Westlock County.

The project involves removing the existing control building which is at end of life and replacing it with a new control building. To fit this control building in the substation, we must expand the southwest corner of the substation by approximately 27 x 6 metres. This expansion is within AltaLink's current Utility Right of Way agreement.

We are also proposing to add an additional access road from Range Road 251 to the southwest corner of the substation for ease of installing the building and for future maintenance access to AltaLink equipment.

After the March 2019 mail out, AltaLink determined that minor alterations to the 723L and 223L transmission lines would be required to accommodate the new access road and for future maintenance. An updated Detail Photo Map is attached.

Contact us

We are available to address any questions or concerns you may have. Please contact us at stakeholderrelations@altalink.ca or 1-877-267-1453. Further information about this project and maps are available at <http://www.altalink.ca/projectfiles/updates/320/Clyde%20PSIP.pdf>

Sincerely,

Dave Lee
