Clyde 150S Substation Upgrade Notice of Project Approval

Thank you for your ongoing participation in the Clyde 150S Substation Upgrade project. The Alberta Utilities Commission (AUC) approved this project for construction on July 19, 2019.

Next steps

Preliminary construction will begin in September 2019 and we anticipate it will take 3 months to complete.

All proposed work will occur within the boundaries of AltaLink's existing Utility Right of Way agreement and within the Westlock County road allowance.

Depending on where you are in relation to the project, you may see or hear:

- noise and construction crews
- work at an existing substation

AUC approval

When the AUC approves a transmission project, it grants AltaLink Permits and licences. The permits and licences for this project can be viewed on the AUC website at:

<https://www2.auc.ab.ca/Proceeding24702/SitePages/ViewDispositions.aspx>

To view the above link, you will need to log in to your eFiling account. If you do not have an account, select 'New Account' in the Login box and follow the steps onscreen. Please note any questions or concerns regarding account creation and management should be directed towards the AUC at info@auc.ab.ca.

If you have any issues accessing these Permits and Licenses, please contact us at the details below and we will mail copies of the documents to you.

Project background

The proposed project involves equipment upgrades at the existing Clyde 150S Substation in SW-36-59-25 W4M, just outside of the Village of Clyde in Westlock County.

The project involves removing the existing control building which is at the end of its life and replacing it with a new control building. To fit this control building in the substation, we must expand the southwest corner of the substation by approximately 27 x 6 metres. This expansion is within AltaLink's current Utility Right of Way agreement.

We are also proposing to add an additional access road from Range Road 251 to the southwest corner of the substation for ease of installing the building and for future maintenance access to AltaLink equipment.

After the March 2019 mail out to stakeholders, AltaLink determined that minor alterations to the 723L and 223L transmission lines would be required to accommodate the new access road and for future maintenance. An updated Detail Photo Map is attached.

Contact us

We are available to address any questions or concerns you may have. Please contact us at stakeholderrelations@altalink.ca or 1-877-267-1453. Further information about this project and maps are available at AltaLink project page <http://www.altalink.ca/projects/view/320/clyde-150s-substation-upgrade>.

Sincerely,

Dave Lee
