

# Clyde 150S Substation Upgrade

You are receiving this newsletter because you are near the Clyde 150S Substation Upgrade project and we want your input.

Upgrades to the electric system in your area are required to replace aging equipment that has reached the end of its life. Replacing some existing substation equipment will ensure residents and businesses continue to have a reliable supply of power.

We are providing you with:

- project details
- a map of the proposed project site
- information about how you can provide your input
- the project schedule

## Project details

The proposed project involves equipment upgrades at the existing Clyde 150S Substation in SW-36-59-25 W4M, just outside of the Village of Clyde in Westlock County.

The project involves removing the existing control building which is at end of life and replacing it with a new control building. To fit this control building in the substation, we must expand the southwest corner of the substation by approximately 29 x 6 metres. This expansion is within AltaLink's current Utility Right of Way agreement. For a detailed overview please refer to the detailed photo map (DP1) included in this package.

We are also proposing to add an additional access road from Range Road 251 to the southwest corner of the substation for ease of installing the building and for future maintenance access to AltaLink equipment.

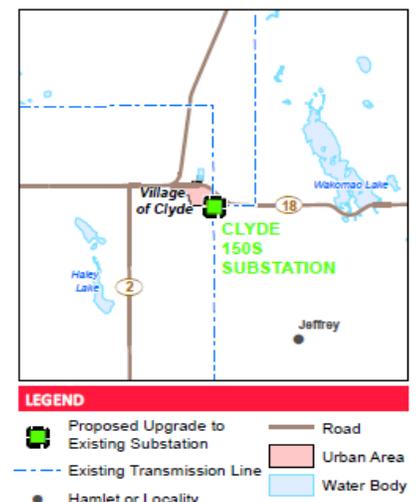

### DEFINITION:

#### Substation

Substations are the connection points between power lines of varying voltages and contain equipment that controls and protects the flow of power. Substations include transformers that step down and step up the voltage so power can be transmitted through transmission lines or distributed to your community through distribution lines.

The existing Clyde 150S Substation

## Next steps

We will contact landowners, residents and occupants near the proposed project to gather input and address questions or concerns. After the consultation process is complete, we will file an application with the Alberta Utilities Commission (AUC). The AUC will review the application through a process in which stakeholders can participate.

We will notify stakeholders when we file the application and again once the AUC has reached a decision about the project. To learn more about the AUC process and how you can become involved, please refer to the brochure included in this package titled Public Involvement in a Proposed Utility Development.

A new control building will go in the site expansion location. It looks similar to this one.

## Anticipated project schedule

Notify stakeholders	March 2019
File application with Alberta Utilities Commission (AUC)	April 2019
Start construction if project is approved	August 2019
Construction completed	October 2019

Although we attempt to follow the anticipated project schedule, it is subject to change. We will continue to provide you with updated schedule information if required as the project progresses.

## Thank you for your cooperation.

If you have any questions or concerns regarding the project, please contact us at 1-877-267-1453 or [stakeholderrelations@altalink.ca](mailto:stakeholderrelations@altalink.ca).
