225L Transmission Line Rebuild

### **Notice of application filing**

Thank you for your ongoing participation in the 225L Transmission Line Rebuild. We submitted an application for the project to the Alberta Utilities Commission (AUC) on March 3, 2020.

### **Next steps**

The AUC will review the application and can approve, approve with conditions or deny the project. The AUC may also host a hearing regarding the project. To learn more about the AUC process and how you can become involved please visit [www.auc.ab.ca](http://www.auc.ab.ca).

We will notify you of the AUC's decision regarding the project. If the project is approved, construction activities could begin as early as August 2020 and is expected to take approximately three months to complete.

If the project is approved, you may see or hear the following during the construction process:

- Noise and construction crews
- Wire stringing on the transmission structures

Where construction activities are required to take place on private property, we will contact you in advance to discuss the specific dates and times we will require access to your property.

### **The application**

The application can be viewed on the AUC's website at [www.auc.ab.ca](http://www.auc.ab.ca).

To access the application, click on the 'eFiling System Login' button on the top of the page and log in to your eFiling account. If you do not have an account, select 'New Account' and follow the steps onscreen. Please note any questions or concerns regarding account creation and management should be directed towards the AUC at [info@auc.ab.ca](mailto:info@auc.ab.ca).

Once your account has been created and you have successfully logged in, enter Filing number 25426 into the 'Go to...' search bar on the top of the page to locate the application. Alternatively, you can navigate to 'Find', click 'Proceedings' and enter "225L" into the 'Description' search bar.

If you have any issues accessing the application, please contact us at the details below and we will mail a copy of the application to you.

## Project background

AltaLink is proposing to rebuild a section of the existing 225L transmission line in the Cardston County area. This section of line was constructed in the late 1960s and is reaching the end of its life cycle. This project is part of AltaLink's ongoing maintenance program and will ensure that the area continues to have a reliable source of electricity for years to come.

The proposed project involves rebuilding approximately 8.4 kilometres of the existing 69kV transmission line (called 225L), which is located along Highway 5 between the Spring Coulee substation and the Hamlet of Spring Coulee.

## Contact us

We are available to address any questions or concerns you may have. Please contact us at [stakeholderrelations@altalink.ca](mailto:stakeholderrelations@altalink.ca) or 1-877-267-1453. Further information about this project and maps are available at <http://www.altalink.ca/projects/view/329/225l-transmission-line-rebuild>.

Sincerely,

Dave Lee  
Manager, Stakeholder Engagement
