Transmission Line 225L Rebuild Notice of project approval

Thank you for your ongoing participation in the 225L Magrath Rebuild project. The Alberta Utilities Commission (AUC) approved this project for construction on May 20, 2021.

Next steps

We plan to begin construction in August 2021 and expect construction to take approximately four months to complete.

Where construction activities are required to take place on private property, we will contact you in advance to discuss the specific dates and times we will require access to your property. Depending on where you are in relation to the project, you may see or hear:

- noise and construction crews
- selective tree and vegetation clearing
- removal of existing line and structures
- transmission structure construction
- wire stringing on the transmission structures

AUC approval

When the AUC approves a transmission project, it grants AltaLink permits and licences. The permits and licences for this project can be viewed on the AUC website at:

<https://www2.auc.ab.ca/Proceeding26325/SitePages/Home.aspx>

To view the above link, you will need to log in to your eFiling account. If you do not have an account, select 'New Account' in the Login box and follow the steps onscreen. Please note any questions or concerns regarding account creation and management should be directed towards the AUC at info@auc.ab.ca

If you have any issues accessing these Permits and Licences, please contact us at the details below and we will mail copies of the documents to you.

Project background

AltaLink is proposing to rebuild a section of the existing 225L transmission line located in Cardston County. This rebuild section will start at the crossing of Township Road 60 and Range Road 220 near the Town of Magrath and follow along Highway 5 to the Hamlet of Spring Coulee. This section of transmission line was constructed in the late 1960s and is reaching the end of its life cycle. This Project is part of AltaLink's ongoing maintenance program and will ensure that the area continues to have a reliable source of electricity for years to come
