BowArk Queenstown Power Plant Interconnection Notice of project approval

Thank you for your ongoing participation in the BowArk Queenstown Power Plant Interconnection. The Alberta Utilities Commission (AUC) approved this project for construction on June 22, 2015.

Project update

BowArk has requested to revise the energization date of the project to January 2017. If you have any questions regarding this change, please contact us using the details below.

Next steps

We plan to begin construction in June 2016 and anticipate it will take approximately five months to complete.

Where construction activities are required to take place on private property, we will contact you in advance to discuss the specific dates and times we will require access to your property.

Depending on where you are in relation to the project, you may see or hear:

- noise and construction crews
- transmission structure construction
- wire stringing on the transmission structures
- work at the existing Queenstown Substation

AUC approval

When the AUC approves a transmission project, it grants AltaLink Permits and Licences. The Permits and Licences for this project can be viewed on the AUC website at:

<https://www2.auc.ab.ca/Proceeding20200/SitePages/ViewDispositions.aspx>

To view the above link, you will need to log in to your eFiling account. If you do not have an account, select 'New Account' in the Login box and follow the steps onscreen. Please note any questions or concerns regarding account creation and management should be directed towards the AUC at info@auc.ab.ca.

If you have any issues accessing these Permits and Licences, please contact us at the details below and we will mail copies of the documents to you.

Project background

The BowArk Queenstown Power Plant Interconnection is approximately 10 kilometres (six miles) northwest of the Village of Milo (in SW-17-19-22-W4) and includes:

- constructing approximately 100 metres (330 feet) of new 138 kV transmission line
- modifications to the existing Queenstown Substation

This transmission development will connect BowArk Energy Ltd.'s McGregor Lake Substation to its proposed power plant, providing our growing province with a new source of electricity.

Contact us

We are available to gather any further input you may have or address any questions or concerns. Please contact us at stakeholderrelations@altalink.ca or 1-877-267-1453.

Further information about this project and maps are available on www.altalink.ca/regionalprojects. You will find the project in the list in alphabetical order.

Sincerely,

Dave Lee
Manager, Stakeholder Engagement
