Carseland Substation Transformer Replacement Notice of application filing and project approval

Thank you for your ongoing participation in the Carseland Substation Transformer Replacement project. The project consists of replacing two transformers at the Carseland Substation – one in 2021 and the second in 2022.

We submitted an application to the Alberta Utilities Commission (AUC) for the first transformer replacement on May 3, 2021. The AUC approved that transformer replacement on May 11, 2021. AltaLink will submit a separate application for the second transformer replacement at a later date.

Next steps

We plan to begin construction in May 2021 for the first transformer replacement and estimate it will take approximately three months to complete.

Where construction activities are required to take place on private property, we will contact you in advance to discuss the specific dates and times we will require access to your property.

Depending on where you are in relation to the project, you may see or hear:

- noise and construction crews
- work at an existing substation
- AltaLink's mobile substation

AUC approval

When the AUC approves a transmission project, it grants AltaLink permits and licences. The permits and licences for this project can be viewed on the AUC website at:

<https://www2.auc.ab.ca/Proceeding26512/SitePages/Home.aspx>

To view the above link, you will need to log in to your eFiling account. If you do not have an account, select 'New Account' in the login box and follow the steps onscreen. Please note any questions or concerns regarding account creation and management should be directed towards the AUC at info@auc.ab.ca.

If you have any issues accessing these permits and licences, please contact us at the details below and we will mail copies of the documents to you.

Project background

AltaLink's proposed project is located approximately 10 kilometres west of the Hamlet of Carseland in Wheatland County.

AltaLink has received or will seek approvals from the AUC to replace two existing transformers at the Carseland Substation:

- One 138/25 kV transformer will be replaced in the spring and summer of 2021
- AltaLink will apply to the AUC to replace one 138/13.8 kV transformer in the summer of 2022

Contact us

We are available to address any questions or concerns you may have. Please contact us at stakeholderrelations@altalink.ca or 1-877-267-1453. Further information about this project and maps are available at:
