Enterprise Solar Interconnection Project Notice of project approval

Thank you for your ongoing participation in the Enterprise Solar Interconnection Project. The Alberta Utilities Commission (AUC) approved this project for construction on October 29, 2021.

Next steps

AltaLink plans to begin construction in April 2022 and anticipates that construction will be complete in the summer of 2022.

Where construction activities are required to take place on private property, AltaLink will contact you in advance to discuss the specific dates and times it will require access to your property.

Depending on where you are in relation to the project, you may see or hear:

- noise and construction crews;
- work on existing transmission structures; and
- wire stringing on the transmission structures.

AUC approval

When the AUC approves a transmission project, it grants AltaLink Permits and Licences. The Permits and Licences for this project can be viewed on the AUC website at:

<https://www2.auc.ab.ca/Proceeding26785/SitePages/Home.aspx>

To view the above link, you will need to log in to your eFiling account. If you do not have an account, select 'New Account' in the Login box and follow the steps onscreen. Please note any questions or concerns regarding account creation and management should be directed towards the AUC at info@auc.ab.ca.

If you have any issues accessing these Permits and Licences, please contact AltaLink at the details provided below and copies of the documents will be mailed to you.

Project background

Enterprise Solar GP Inc. is proposing to build a new substation and transmission line as part of their Enterprise Solar project. To connect their proposed facility to the grid, modifications to AltaLink's existing 161L/180L transmission line are required.

To connect the Enterprise Solar project to the grid, AltaLink will modify two existing structures on an existing double circuit 138 kilovolt (kV) transmission line (called 161L/180L). The modifications include the installation of new hardware on the existing structures and may require the replacement of one structure. This transmission line is located within the road allowance south of SW-26-16-25-W4.
