Spring Coulee Telecommunications Pole Salvage Notice of application filing and project approval

Thank you for your ongoing participation in the Spring Coulee Telecommunications Pole Salvage project. We submitted an application for the project to the Alberta Utilities Commission (AUC) on Monday, August 9, 2021. The AUC approved this project for construction on Friday, August 13, 2021.

Next steps

We plan to begin construction in September 2021 and expect it to take one week to complete.

All work related to this salvage, including the potential use of cranes, will occur on land owned by AltaLink. Access to private property is not required.

Depending on where you are in relation to the project, you may see or hear:

- noise and construction crews; and
- selective tree and vegetation clearing.

AUC approval

When the AUC approves a transmission project, it grants AltaLink Permits and Licences. The Permits and Licences for this project can be viewed on the AUC website at:

<https://www2.auc.ab.ca/Proceeding26761/SitePages/Home.aspx>

To view the above link, you will need to log in to your eFiling account. If you do not have an account, select 'New Account' in the login box and follow the steps onscreen. Please note any questions or concerns regarding account creation and management should be directed towards the AUC at info@auc.ab.ca.

If you have any issues accessing these Permits and Licences, please contact us at the details below and we will mail copies of the documents to you.

Project background

The telecommunications pole at AltaLink's Spring Coulee Substation is no longer required so we are proposing to remove it. The Spring Coulee substation is located in SE-15-4-24-W4M in Cardston County.

Contact us

We are available to address any questions or concerns you may have. Please contact us at stakeholderrelations@altalink.ca or 1-877-267-1453. Further information about this project and maps are available at:
