## **Cadomin Substation Transformer Replacement Project Notice of application filing and approval**

Thank you for your ongoing participation in the Cadomin Substation Transformer Replacement Project. AltaLink submitted an application for the project to the Alberta Utilities Commission (AUC) on May 26, 2022. The AUC approved this project for construction on June 1, 2022.

### Next steps

AltaLink plans to begin construction in July 2022 and anticipate construction to be complete in fall of 2022.

Depending on where you are in relation to the project, you may see or hear:

- noise and construction crews;
- construction equipment;
- a mobile substation; and
- work at an existing substation.

### AUC Approval

When the AUC approves a transmission project, it grants AltaLink Permits and Licences. The Permits and Licences for this project can be viewed on the AUC's website at:

<https://www2.auc.ab.ca/Proceeding27407/SitePages/ViewDispositions.aspx>

To access the application, click on the 'eFiling System Login' button on the top of the page and log in to your eFiling account. If you do not have an account, select 'New Account' and follow the steps onscreen. Please note any questions or concerns regarding account creation and management should be directed towards the AUC at [info@auc.ab.ca](mailto:info@auc.ab.ca).

Once your account has been created and you have successfully logged in, enter Filing number 27407 into the 'Go to...' search bar on the top of the page to locate the application. Alternatively, you can navigate to 'Find', click 'Proceedings' and enter "Cadomin" into the 'Description' search bar.

If you have any issues accessing the application, please contact AltaLink at the details provided below and a copy of the application will be mailed to you.

### Project background

AltaLink's Cadomin Substation is located at SE-17-47-23-W5, approximately two kilometres north of the Hamlet of Cadomin in Yellowhead County.

AltaLink is proposing to install one new 72 kilovolt (kV) transformer at the Cadomin Substation to replace a transformer that has reached the end of its life and needs to be replaced. The new transformer will be operated at 69 kV.

A fence expansion is required for this project to allow for easier access to equipment in the Cadomin Substation. AltaLink is proposing to expand the fenceline in the northeast corner of the substation by approximately seven by eight metres, for a total fenceline size of 21 by 24 metres. As this expansion will occur on existing AltaLink dispositions, no new land is required.

To avoid a potential power outage while completing work, AltaLink will temporarily install a mobile substation. The mobile substation will be located outside of the substation along 50 Street. Additional temporary workspace on public land outside of the substation will be required to accommodate the connection and operation of the mobile substation.

#### Contact us

AltaLink is available to address any questions or concerns you may have. Please contact us at [stakeholderrelations@altalink.ca](mailto:stakeholderrelations@altalink.ca) or 1-877-267-1453. Further information about this project and maps are available at <https://www.altalink.ca/projects/view/368/cadomin-substation-upgrade>.

Sincerely,

Kris Gladue

Manager, Indigenous Relations and Consultation
