## **700L Transmission Line Relocation Project update – printing error**

We recently sent you an information package about the proposed 700L Transmission Line Relocation because you are a stakeholder on this project.

A printing error was made in this information package, and an additional letter was included by mistake. You may have received a copy of a notice of application filing for the Enterprise Solar Connection project near Vulcan, Alberta. This project is unrelated to the 700L Transmission Line Relocation. The other documents contained in this information package – a project newsletter, map, and information on precautions we're taking during the COVID-19 pandemic – are all correct.

We apologize for any confusion.

### **Project background**

To accommodate its North of Yellow Head Road Upgrades, Strathcona County has requested the relocation of a portion of AltaLink's 138 kilovolt (kV) 700L transmission line.

This proposed project involves relocating approximately two kilometres of the 700L transmission line that is located north of Highway 16 in Strathcona County along Range Road 231. We are proposing to relocate the line up to approximately 70 metres to the east to accommodate Strathcona County's plans to widen the road.

### **Contact us**

We are available to address any questions or concerns you may have. Please contact us at [stakeholderrelations@altalink.ca](mailto:stakeholderrelations@altalink.ca) or 1-877-267-1453. Further information about this project and maps are available on [www.altalink.ca/projects](http://www.altalink.ca/projects). You will find the project in the list in alphabetical order.

Sincerely,

Dave Lee  
Manager, Stakeholder Engagement
