**Castle Rock Ridge to Chapel Rock Transmission Project:  
1201L noise concern update**

Thank you for your previous participation in the Castle Rock Ridge to Chapel Rock Transmission Project. We would like to provide an update regarding information from our April 2015 project information package.

We have heard from landowners that the existing 500 kilovolt (kV) 1201L transmission line is creating noise during windy conditions. The noise concern raised by landowners regarding the existing 1201L transmission line west of Highway 22 has been investigated by an acoustical noise expert and AltaLink has been advised that the probability for the 500 kV lines proposed for this project to produce a similar noise is very low and the incidences of noise would be very infrequent.

It was incorrectly noted in our April 2015 information package that the 500 kV section of the proposed project will use different conductors than the existing 1201L transmission line. The conductors used for the 500 kV sections of the proposed project will be the same as the existing 1201L transmission line.

AltaLink plans to install additional spacer dampers on sections of the existing 1201L transmission line in 2016. Spacer dampers reduce vibration along the conductors of the transmission line and the external acoustical noise expert believes this may help reduce noise along the line. AltaLink will continue to monitor the situation as we work to find a solution.

Please note that you are identified as owning land no longer under consideration for this project and you will not be receiving updates moving forward. However, if you own other land with routes still under consideration you will continue to receive project updates.

If you have any further questions or concerns, or would like to continue receiving project updates, please contact us at [stakeholderrelations@altalink.ca](mailto:stakeholderrelations@altalink.ca) or 1-877-269-5903. All project materials, including maps and newsletters, can be found at [www.altalink.ca/projects/crrcr](http://www.altalink.ca/projects/crrcr).

Yours sincerely,

Pam Kean  
Director, Consultation
