150L Transmission Line Rebuild Notice of project approval

Thank you for your ongoing participation in the 150L Transmission Line Rebuild. The Alberta Utilities Commission (AUC) approved this project for construction on April 28, 2023.

The AUC approved:

- AltaLink's preferred transmission line rebuild route and preferred route variant to rebuild a 27-kilometre portion of the 138 kilovolt (kV) transmission line
- the replacement of the existing wooden H-frame structures with primarily single-pole steel or wood structures
- the removal and salvage of the existing transmission line

The approved transmission line rebuild primarily follows the existing alignment of the 150L transmission line, but with a minor modification between point designations A96 - A98, shown on the map included in this package.

Next steps

AltaLink will be starting its pre-construction activities in the coming weeks with data collection surveys starting in June to confirm specific location details along the selected route. Other activities may include geotechnical surveys, environmental surveys, land acquisition, and identifying structure locations.

Where construction activities are required to take place on private property, we will contact you in advance to discuss the specific dates and times we will require access to your property.

We plan to begin construction in October 2024, and anticipate construction to be complete in March 2025.

Depending on where you are in relation to the project, you may see or hear:

- noise and construction crews
- right-of-way and construction preparation
- transmission structure construction
- wire stringing on the transmission structures

The existing 150L transmission line will be removed and salvaged in stages as portions of the rebuild are completed. We do not anticipate any disruption of power to residents while the transmission line is being rebuilt.

We will keep you informed as the project progresses and provide notifications regarding construction and construction preparation activities.

AUC approval

When the AUC approves a transmission project, it grants AltaLink permits and licences. The permits and licences for this project can be viewed on the AUC website at:

<https://www2.auc.ab.ca/Proceeding27523/SitePages/ViewDispositions.aspx>

To view the above link, you will need to log in to your eFiling account. If you do not have an account, select 'New Account' in the login box and follow the steps onscreen. Please note, any questions or concerns regarding account creation and management should be directed towards the AUC at info@auc.ab.ca

If you have any issues accessing these permits and licences, please contact us at the details below and we will mail copies of the documents to you.

Contact us

We are available to address any questions or concerns you may have. Please contact us at stakeholderrelations@altalink.ca or 1-877-267-1453. Further information about this project and maps are available at <https://www.altalink.ca/projects/view/344/150l-transmission-line-rebuild>.

Sincerely,

Kris Gladue
