## **185L and 412L Transmission Line Rebuild Project update**

Thank you for your ongoing participation in the 185L and 412L Transmission Line Rebuild project. The Alberta Utilities Commission (AUC) approved this project for construction on September 13, 2024.

### **Changes to project schedule**

We originally anticipated construction to begin in May 2026 and end in September 2026, however we now expect it to begin in October 2029 and end in December 2029. The deferral in schedule is due to some changes in AltaLink's approved capital project funding.

There are no other changes to the project since the information provided in September 2024.

### **Project details**

The approved project is located approximately one kilometre north of the Town of Pincher Creek. It involves rebuilding approximately 5.5 kilometres of:

- existing 69 kilovolt (kV) single-circuit transmission line (called 185L)
- existing 138 kV single-circuit transmission line (called 412L)

Instead of rebuilding these as two separate lines, AltaLink will consolidate both of the single circuit lines into one new double-circuit transmission line. The new transmission line will be rebuilt within AltaLink's existing rights-of-way.

### **Contact us**

We are available to address any questions or concerns you may have. Please contact us at [stakeholderrelations@altalink.ca](mailto:stakeholderrelations@altalink.ca) or 1-877-267-1453.

Sincerely,

Kris Gladue
