691L Transmission Line Structure Relocations Notice of application filing and approval

Thank you for your ongoing participation in the 691L Transmission Line Structure Relocations project. We submitted an application for the project to the Alberta Utilities Commission (AUC) on May 29, 2026. The AUC approved this project for construction on June 4, 2026.

Next steps

We plan to begin construction in September 2026 and anticipate construction to be completed in the same month. Where construction activities are required to take place on private property, we will contact you in advance to discuss the specific dates and times we will require access to your property.

Depending on where you are in relation to the project, you may see or hear:

- noise and construction crews
- transmission structure construction
- wire stringing on the transmission structures

AUC Approval

When the AUC approves a transmission project, it grants AltaLink Permits and licences. The permits and licences for this project can be viewed on the AUC website at:
<https://www2.auc.ab.ca/proceeding/30874>

To access the application, scroll down the main page and click on the 'Access here' option under 'Access to the eFiling System' and log in to your eFiling account. If you do not have an account, select 'New personal account' or 'New organization account' and follow the steps on the screen. Please note any questions or concerns regarding account creation and management should be directed towards the AUC at info@auc.ab.ca.

Once your account has been created and you have successfully logged in, enter filing number "30874" into the 'Go to...' search bar on the top of the page to locate the application.

If you have any issues accessing the application, please contact us at the details below and we will mail a copy of the application to you.

Project background

To accommodate a new industrial development located in Rocky View County, southwest of the City of Chestermere, AltaLink is relocating approximately 500 metres of its existing 691L Transmission Line up to approximately 10 metres to the north. This relocation will require the following modifications:

- removing five existing transmission structures
- adding six new transmission structures

Contact us

We are available to address any questions or concerns you may have. Please contact us at stakeholderrelations@altalink.ca or 1-877-267-1453. Further information about this project and maps are available at <https://www.altalink.ca/project/691l-transmission-line-structure-relocations/>.

Sincerely,

Kris Gladue
Manager, Stakeholder Engagement
