799L Transmission Line Rebuild Notice of project approval

Thank you for your ongoing participation in the 799L Transmission Line Rebuild project. The Alberta Utilities Commission (AUC) approved this project for construction on March 4, 2025.

The AUC approved:

- AltaLink's preferred transmission line route, which includes rebuilding the 799L transmission line along the existing alignment for the majority of the 62 kilometres of line being rebuilt.
- AltaLink's alternate route segment for one portion of the transmission line, located between the South Mayerthorpe 443S Substation and Highway 22.

AltaLink's approved route is shown on the map included in this package.

Next steps

Where construction activities are required to take place on private property, we will contact you in advance to discuss the specific dates and times we will require access to your property.

We plan to begin construction in April 2025 and anticipate construction to be complete in Spring 2027. Depending on where you are in relation to the project, you may see or hear:

- noise and construction crews
- right-of-way and construction preparation
- selective tree and vegetation clearing
- transmission structure construction
- wire stringing on the transmission structures

AUC approval

When the AUC approves a transmission project, it grants AltaLink Permits and licences. The permits and licences for this project can be viewed on the AUC website at:

<https://www2.auc.ab.ca/proceeding/28957/dispositions>

To view the above link, you will need to log in to your eFiling account. If you do not have an account, select 'New Account' in the Login box and follow the steps onscreen. Please note any questions or concerns regarding account creation and management should be directed towards the AUC at info@auc.ab.ca

If you have any issues accessing these Permits and Licences, please contact us at the details below and we will mail copies of the documents to you.

Project background

AltaLink is proposing to rebuild approximately 62 kilometres of its existing 799L transmission line between Entwistle and Whitecourt. Portions of this line, built in 1964, have reached the end of their lifecycle and need to be rebuilt to improve the safe and reliable operation of the line for years to come.

Contact us

We are available to address any questions or concerns you may have. Please contact us at stakeholderrelations@altalink.ca or 1-877-267-1453. Further information about this project and maps are available at <https://www.altalink.ca/project/7991-transmission-line-rebuild/>

Sincerely,

Kris Gladue
