

NOTES

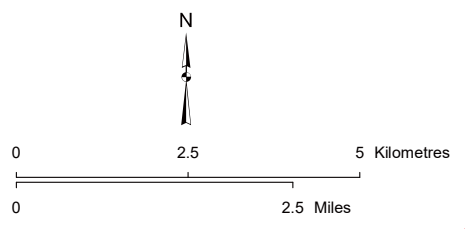

AltaLink is proposing to rebuild the transmission line along the existing alignment for most of the project. However, we are reviewing the potential of relocating two sections of the line. There are four sections of the line, shown as A, B, C and D that AltaLink will file an application with the Alberta Utilities Commission. AltaLink is completing additional work on the 799L transmission line (shown in purple on the included maps) in the area.

How to read your map:

This map will help you locate the proposed rebuild for the transmission line in relation to your property. The point designations, black dots with corresponding red letters and numbers (for example A1), will assist to identify different features such as start or end points. They are also noted on the strip map for that area.
