922L/926L Transmission Line Relocation Notice of application filing and approval

Thank you for your ongoing participation in the 922L/926L Transmission Line Relocation project.

We submitted an application for the project to the Alberta Utilities Commission (AUC) on December 14, 2022. The Alberta Utilities Commission (AUC) approved this project for construction on December 20, 2022.

Next steps

We plan to begin construction in January 2023, and anticipate construction to be complete by the end of the year.

Depending on where you are in relation to the project, you may see or hear:

- noise and construction crews
- salvaging of existing telecommunications tower
- construction of new telecommunications tower

AUC Approval

When the AUC approves a transmission project, it grants AltaLink permits and licences. The permits and licences for this project can be viewed on the AUC website at:
<https://www2.auc.ab.ca/Proceeding27873/SitePages/Home.aspx>

To access the application, click on the 'eFiling System Login' button on the top of the page and log in to your eFiling account. If you do not have an account, select 'New Account' and follow the steps onscreen. Please note any questions or concerns regarding account creation and management should be directed towards the AUC at info@auc.ab.ca.

Once your account has been created and you have successfully logged in, enter Filing number 27873 into the 'Go to...' search bar on the top of the page to locate the application. Alternatively, you can navigate to 'Find', click 'Proceedings' and enter "922L" into the 'Description' search bar.

If you have any issues accessing the application, please contact us at the details below and we will mail a copy of the application to you.

Project background

AltaLink is proposing to relocate a portion of the existing 240 kilovolt (kV) transmission line (called 922L/926L) that is located in Parkland County in SW-17-52-4-W5. This portion of line is being affected by water and ice in the winter. There is currently no risk to public safety and electricity service, but relocating this portion will allow us to maintain the safety and reliability of the transmission line in the future.

The proposed project includes:

- relocating a portion of the existing 922L/926L transmission line along a new alignment
- constructing four new structures and modifying two existing structures along the new alignment
- salvaging the replaced transmission line and structures

The right-of-way for the existing portion of line is 30 metres (m) and the right-of-way for the relocated portion will be 32 m. All work related to this relocation and salvage, including the potential use of cranes, will occur on land owned by TransAlta.

Contact us

We are available to address any questions or concerns you may have. Please contact us at stakeholderrelations@altalink.ca or 1-877-267-1453. Further information about this project and maps are available at <https://www.altalink.ca/projects/view/397/922l-926l-transmission-line-relocation>.

Sincerely,

Kris Gladue
