

August to November 2022

# CONSTRUCTION ACTIVITIES IN YOUR AREA

## 113L Transmission Line Rebuild

To ensure the safety and reliability of the electric system in your area, AltaLink is rebuilding the existing 113L transmission line between the Town of Canmore and the Kananaskis River.

Over the next few weeks, construction and vegetation management activities are scheduled to begin again.

### August 12: Helicopter inspections

On Friday, August 12, AltaLink will use a helicopter to perform visual inspections of our transmission lines in the area as we prepare to continue work on the 113L transmission line. You may see us in or near Canmore, Dead Man's Flats and Lac Des Arcs between the hours of 8 a.m. and 4 p.m.

### August to November:

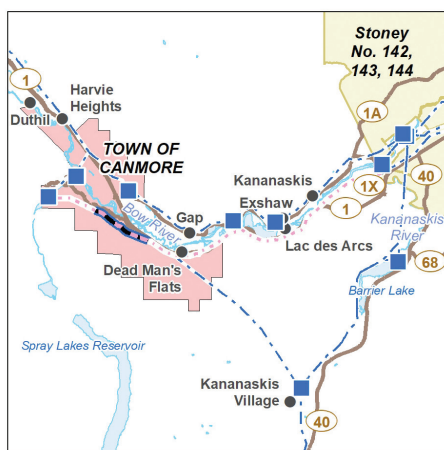

### Construction and vegetation management activities

Construction and vegetation management activities will occur between Lac Des Arcs and the Kananaskis River beginning Monday, August 15. Depending on where you are in relation to the project, you may see or hear:

- noise and construction crews
- transmission structure construction and removal
- wire stringing on the transmission structures
- ongoing tree and vegetation management clearing, including logging equipment and trucks

Vegetation debris, including branches, will be safely burned. These vegetation burnings will be highly controlled and follow strict safety protocols. Smoke may be visible in parts of Canmore, Dead Man's Flats and Lac Des Arcs.

Occasional traffic accommodations, such as speed reductions and lane closures, may be required on Highway 1 near Lac Des Arcs and Dead Man's Flats during construction activities. We will share updates on our social media accounts.
