

**How to read your map**

This map will help you locate the transmission line options being proposed in relation to your property. The black dots called designation points (for example A0) will identify different route segments and features along the route. Features may be a change in the right-of-way size, different structure types, or a route deflection which will be noted on the strip map for that area.

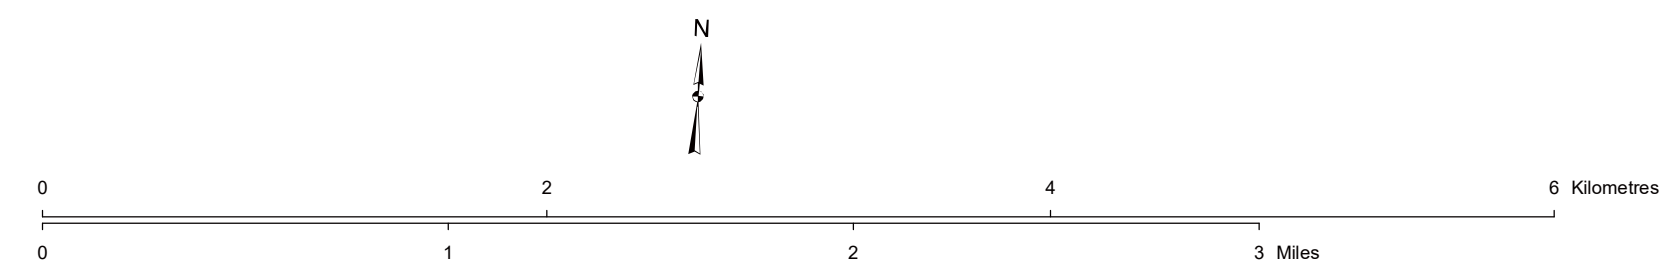

**LEGEND**

- Point Designation
- Existing Transmission Tower
- ✕ Proposed Wind Turbine
- ✕ Approved Wind Turbine
- Potential Transmission Line
- Existing Transmission Line
- 983AL Transmission Line
- Potential Substation Target Area
- 3rd Party Substation Site Area
- Woolchester 1019S Substation
- Residence
- Wellsite
- Pipeline
- River or Stream
- Road
- Crown Land
- Environmentally Significant Area
- Water Body
