City of Edmonton Transmission Reinforcement Notice of project approval

Thank you for your ongoing participation in the City of Edmonton Transmission Reinforcement project. The Alberta Utilities Commission (AUC) approved this project on March 27, 2026. The AUC approved EPCOR's preferred transmission line route to connect its new 993L/915L transmission line to AltaLink's existing 915L transmission line located in Hermitage Park. The approved route and connection point are shown on the map included in this package.

Next steps

Where construction activities are required to take place on private property, we will contact you in advance to discuss the specific dates and times we will require access to your property.

We plan to begin construction in Winter 2027 and anticipate construction to be complete in June 2028. We will coordinate construction activities with EPCOR.

Depending on where you are in relation to the project, you may see or hear:

- noise and construction crews
- transmission structure construction
- wire stringing on the transmission structures
- optical ground wire installation

AUC approval

When the AUC approves a transmission project, it grants AltaLink permits and licences. The permits and licences for this project can be viewed on the AUC website at:

<https://www2.auc.ab.ca/proceeding/29866>

To view the above link, you will need to log in to your eFiling account. If you do not have an account, select 'New personal account' or 'New organization account' and follow the steps on the screen. Please note any questions or concerns regarding account creation and management should be directed towards the AUC at info@auc.ab.ca.

If you have any issues accessing these Permits and Licences, please contact us at the details below and we will mail a copy of the application to you.

Project background

AltaLink is making changes to its transmission system to connect EPCOR's City of Edmonton Transmission Reinforcement project to the grid. The project is located in northeast Edmonton near the North Saskatchewan River. AltaLink's project includes:

- installing two new steel monopole structures on AltaLink's existing 240 kilovolt (kV) 915L transmission line in Hermitage Park
- installing 1.6 kilometres of optical ground wire between the new structures and EPCOR's existing Clover Bar Substation

Contact us

We are available to address any questions or concerns you may have. Please contact us at stakeholderrelations@altalink.ca or 1-877-267-1453. Further information about this project and maps are available at <https://www.altalink.ca/project/city-of-edmonton-transmission-reinforcement/>.

Sincerely,

Kris Gladue
