

PLANNED POWER OUTAGE IN YOUR AREA

Coleman Substation Transformer Replacement
is happening on May 14

AltaLink
2611 3 Avenue SE
Calgary, AB T2A 7W7

AltaLink is upgrading equipment at its existing Coleman Substation to ensure a reliable supply of electricity is available in the area for years to come. This work is starting in May and is expected to be complete by December 2025.

For AltaLink to safely begin upcoming work as part of this upgrade, a power outage is required.

To minimize the impact of the outage, we are completing this work overnight.

The outage is scheduled for the early hours of May 14, from 12 a.m. to 4 a.m., and will impact the areas along Highway 3 from Island Lake to the western half of Blairmore.

You will be contacted by FortisAlberta with confirmed details ahead of the outage. You are encouraged to contact your electricity retailer (the company that sends your bill) to ensure your contact information is up-to-date.
