March 24, 2025

# Coleman Substation Transformer Replacement Notice of application filing and approval

Thank you for your ongoing participation in the Coleman Substation Transformer Replacement. We submitted an application for the project to the Alberta Utilities Commission (AUC) on March 7, 2025. The AUC approved this project for construction on March 13, 2025.

#### **Next steps**

Where construction activities are required to take place on private property, we will contact you in advance to discuss the specific dates and times we will require access to your property.

We plan to begin construction in May 2025, and anticipate construction to be complete by December 2025.

Depending on where you are in relation to the project, you may see or hear:

- noise and construction crews
- work at an existing substation
- transmission line construction

## **AUC Approval**

When the AUC approves a transmission project, it grants AltaLink Permits and licences. The permits and licences for this project can be viewed on the AUC website at: https://www2.auc.ab.ca/proceeding/29900

To access the application, click on the 'Access to the eFiling System' button on the main page and log in to your eFiling account. If you do not have an account, select 'New Account' and follow the steps onscreen. Please note any questions or concerns regarding account creation and management should be directed towards the AUC at info@auc.ab.ca.

Once your account has been created and you have successfully logged in, enter Filing number "29900" into the 'Go to...' search bar on the top of the page to locate the application.

Alternatively, you can navigate to 'Find', click 'Proceedings' and enter "Coleman" into the 'Description' search bar.

If you have any issues accessing the application, please contact us at the details below and we will mail a copy of the application to you.

## **Project background**

AltaLink is proposing to upgrade equipment at its existing substation within the Town of Coleman. The proposed project will include:

- Replacing an aging transformer with one new transformer
- Constructing a temporary bypass transmission line to avoid interruption to service

The temporary bypass line will be located within AltaLink's existing right-of-way and connect the existing 170L and 786L transmission lines. The temporary bypass line will be removed after the new transformer is installed and operational.

#### **Contact us**

We are available to address any questions or concerns you may have. Please contact us at stakeholderrelations@altalink.ca or 1-877-267-1453. Further information about this project and maps are available at https://www.altalink.ca/project/coleman-substation-transformer-replacement.

Sincerely,

Kris Gladue Manager, Stakeholder Engagement
