

OCTOBER 2025

# D610L Transmission Line Salvage

You are receiving this newsletter because you are near the proposed D610L Transmission Line Salvage, and we want your input.

AltaLink is proposing to decommission and salvage a portion of the existing D610L transmission line that is no longer required for service. The project is located east of the town of Taber, in the Municipal District of Taber.

More information about the proposed project can be found on the included map.

## ANTICIPATED PROJECT SCHEDULE

<p><b>OCTOBER 2025</b> <i>Notify and consult with stakeholders</i></p>	<p><b>NOVEMBER 2025</b> <i>File application with Alberta Utilities Commission (AUC)</i></p>	<p><b>FALL 2026</b> <i>Start construction if project is approved</i></p>	<p><b>SPRING 2027</b> <i>Construction completed</i></p>
--	---	--	---

Although we attempt to follow the anticipated project schedule it is subject to change. We will continue to provide you with updated schedule information if required as the project progresses.

## Project details

As part of the Vauxhall Area Transmission Development (VATD), most of the existing 610L transmission line was rebuilt within the southern road allowance of Township Road 102. This rebuild was approved by the AUC and completed in March 2025.

The Alberta Electric System Operator has informed AltaLink that the replaced portion of the 610L transmission line, now called D610L, is no longer required. As a result, AltaLink is proposing to salvage 11 kilometres of the existing D610L transmission line.

For more information about the VATD Project, please contact us.

FortisAlberta has distribution lines attached to the D610L structures. AltaLink is coordinating the salvage of the D610L transmission line with FortisAlberta to accommodate the replacement of these distribution lines.

You may experience an interruption to electrical service to your home or business during this work. FortisAlberta will contact you directly prior to any planned outage. If you have questions about this process or potential outages, please call FortisAlberta at 403-310-WIRE (9473).

To complete the safe salvage of the D610L transmission line, AltaLink may require temporary construction workspace, which is proposed as 10 metres along the north side of the road allowance only where needed. Once the project is approved and a coordinated salvage plan is finalized with FortisAlberta, AltaLink will work with landowners to refine these construction workspaces.

Above: The existing D610L transmission line is shown on the right.

## Providing your input

We will notify landowners, residents and occupants near the proposed project to gather input and address questions or concerns.

After our notification process is complete, we will file an application with the Alberta Utilities Commission (AUC).

We will notify stakeholders when we file the application and again once the AUC has reached a decision about the project. To learn more about the AUC process and how you can become involved, please refer to the brochure included in this package titled *Participating in the AUC's independent review process to consider facility applications*.

## INCLUDED IN THIS INFORMATION PACKAGE:

- Project maps
- AUC brochure: *Participating in the AUC's independent review process to consider facility applications*
- Electric and Magnetic Fields (EMF) information

The AESO is an independent, not-for-profit organization responsible for the safe, reliable, and economic planning and operation of the provincial transmission grid. For more information about why this project is needed, please refer to the AESO's Need Overview included with this package or visit [www.aeso.ca](http://www.aeso.ca). If you have any questions or concerns about the need for this project or the proposed transmission development to meet the need you may contact the AESO directly. You can make your questions or concerns known to a transmission facility owner representative who will collect your personal information for the purpose of addressing your questions and/or concerns to the AESO. This process may include disclosure of your personal information to the AESO.
