

### How to read your map

This map will help you locate proposed routes in relation to your property. The side titled Detail Base highlights routing criteria such as residences and environmental considerations. The side titled Detail Photo is an aerial image and provides landscape details. The black dots and corresponding letters and numbers (for example A20) will help you identify the route you are closest to.

	<b>Red</b> Potential 240 kV transmission line route		<b>Orange</b> Potential 500 kV transmission line route
	<b>Orange and red dashed</b> Potential 240 kV or 500 kV transmission line route		<b>Blue box</b> Potential substation development area

Although there are many proposed route locations, if the project is approved by the Alberta Utilities Commission, only one route will be constructed.

### LEGEND

● Point Designation	□ Potential Substation Target Area	— Highway	■ Forested
○ Potential Substation Upgrade	■ Existing Substation	— Road	■ Native Grassland / Tame Pasture
○ Potential Telecommunication Tower Site	— Existing Transmission Line	— Municipal or County Boundary	■ Park / Other Protected Area
— Potential 240kV Transmission Line Route	■ DU Ranchlands Cabin	— Pipeline	■ Hamlet or Locality
— Potential 240kV or 500kV Transmission Line Route	● Hamlet or Locality	— Railway	■ Residence
— Potential 500kV Transmission Line Route	— Residence	— River or Stream	— Potential Modification of Existing Transmission Line
— Potential Salvage of Existing Transmission Line	— Potential Modification of Existing Transmission Line	— Water Body	— Potential Salvage of Existing Transmission Line
— Study Area	— Study Area	— Airport	— Study Area
		— First Nations Reserve	
		■ Other Altalink Project	
		— Potential Alberta/British Columbia Intertie Restoration Project Series	
		■ Capacitor Location
