ENGIE Buffalo Trail North Wind Connection– Project cancellation notification

Thank you for your participation in the ENGIE Development Canada LP (ENGIE) Buffalo Trail North Wind Connection. In June 2021, AltaLink began consulting with stakeholders on the proposed project.

This letter is to inform you that ENGIE has requested to cancel their system access service request with the Alberta Electric System Operator (AESO). As a result, AltaLink's related project is no longer required.

If you have questions about ENGIE's project, please contact Rob Maitland, Business Development Director at 1-647-403-2216 or rob.maitland@engie.com.

If you have questions about the cancelled request for system access service, please contact the AESO at 1-888-866-2959 or stakeholder.relations@aeso.ca.

Project background

To accommodate the connection, AltaLink had proposed to construct approximately 215 metres (m) of 240 kV single-circuit transmission line from ENGIE's proposed substation to AltaLink's existing 983L transmission line.

AltaLink had also planned to install approximately 395 m of new underground fibre optic telecommunications cable.

Contact us

We are available to address any questions or concerns you may have. Please contact us at stakeholderrelations@altalink.ca or 1-877-267-1453. You can also view more information about the project at <http://www.altalink.ca/projects>.

Sincerely,

Kris Gladue
Manager, Stakeholder Engagement
