

JANUARY 2026

Hutchison Battery Storage Facility Connection Project

You are receiving this newsletter because you are near the proposed Hutchison Battery Storage Facility Connection Project, and we want your input.

To connect Enfinite’s Hutchison Battery Storage Facility Project to the grid, AltaLink is proposing to upgrade equipment at the existing Bowmanton 244S Substation. The project is located approximately 18 kilometres northeast of the City of Medicine Hat in NW-15-14-4- W4.

AltaLink’s connection and Enfinite’s Hutchison Battery Storage Facility are separate. For more information about Enfinite’s Hutchison Battery Storage Facility Project, see their contact information included in this newsletter.

Project details

The proposed project will include:

- adding a 240 kilovolt (kV) **circuit breaker**
- adding or modifying associated equipment as required

All work will be conducted within the existing fenceline. Please refer to the map included in this package for an overview of the proposed project.

ANTICIPATED PROJECT SCHEDULE

<p>JANUARY - FEBRUARY 2026 <i>Notify and consult with stakeholders</i></p>	<p>MARCH 2026 <i>File application with Alberta Utilities Commission (AUC)</i></p>	<p>JULY 2029 <i>Start construction if project is approved</i></p>	<p>NOVEMBER 2029 <i>Construction completed</i></p>
--	---	---	--

Although we attempt to follow the anticipated project schedule it is subject to change. We will continue to provide you with updated schedule information if required as the project progresses.

The new circuit breaker will look similar to the picture above

Providing your input

We will contact landowners, residents, and occupants near the proposed project to gather input and address questions or concerns.

After our consultation and notification process is complete, we will file an application with the Alberta Utilities Commission (AUC).

We will notify stakeholders when we file the application and again once the AUC has reached a decision about the project. To learn more about the AUC process and how you can become involved, please refer to the brochure included in this package titled *Participating in the AUC's independent review process to consider facility applications*.

Electric and Magnetic Fields (EMF)

We understand that you may have concerns about exposure to EMF and we take those concerns seriously. Everyone is exposed to power frequency EMF from many sources, including power lines, building wiring, or appliances in your home.

Health Canada, the World Health Organization, and other agencies have not recommended that the public needs to take steps to limit their everyday exposure to EMF from high voltage transmission lines. This includes people that live near the edge of a transmission line right-of-way.

If you have any questions about EMF, please contact us.

INCLUDED IN THIS INFORMATION PACKAGE:

- Project map
- AUC brochure: *Participating in the AUC's independent review process to consider facility applications*
- AESO need overview

DEFINITIONS:

Substation | Substations are the connection points between power lines of varying voltages and contain equipment that controls and protects the flow of power. Substations include transformers that step down and step up the voltage so power can be transmitted through transmission lines or distributed to your community through distribution lines.

Circuit Breaker | Circuit breakers are electrical switches inside a substation that protect substation equipment. Circuit breakers help ensure the safety and reliability of the electric system.

The AESO is an independent, not-for-profit organization responsible for the safe, reliable, and economic planning and operation of the provincial transmission grid. For more information about why this project is needed, please refer to the AESO's Need Overview included with this package or visit www.aeso.ca. If you have any questions or concerns about the need for this project or the proposed transmission development to meet the need you may contact the AESO directly. You can make your questions or concerns known to a transmission facility owner representative who will collect your personal information for the purpose of addressing your questions and/or concerns to the AESO. This process may include disclosure of your personal information to the AESO.
