

APRIL 2026

# Flatbush Transformer Salvage Project

You are receiving this newsletter because you are near the proposed Flatbush Transformer Salvage Project, and we want your input.

AltaLink is proposing to remove and salvage a transformer that is no longer needed at its existing Flatbush 500s Substation. The proposed project is located within the Municipal District of Lesser Slave River.

## ANTICIPATED PROJECT SCHEDULE

<p><b>APRIL 2026</b> Notify and consult with stakeholders</p>	<p><b>JULY 2026</b> File application with Alberta Utilities Commission (AUC)</p>	<p><b>AUGUST 2026</b> Start construction if project is approved</p>	<p><b>AUGUST 2026</b> Construction completed</p>
---	--	---	--

Although we attempt to follow the anticipated project schedule, it is subject to change. We will continue to provide you with updated schedule information if required as the project progresses.

## Project details

The proposed project includes removing and salvaging one **transformer** that is no longer needed.

The work will be completed within the existing substation fenceline; no new fenceline expansion is required.

Please refer to the map included in this package for an overview of the proposed project area.

The existing transformer being removed is in the photo above

## Providing your input

We will contact landowners, residents, and occupants near the proposed project to gather input and address questions or concerns.

After our consultation and notification process is complete, we will file an application AUC.

We will notify stakeholders when we file the application and again once the AUC has reached a decision about the project. To learn more about the AUC process and how you can become involved, please refer to the brochure included in this package titled *Participating in the AUC's independent review process to consider facility applications*.

### INCLUDED IN THIS INFORMATION PACKAGE:

- Project map
- AUC brochure: *Participating in the AUC's independent review process to consider facility applications*
- Electric and Magnetic Fields information

### DEFINITIONS:

**Substation** | Substations are the connection points between power lines of varying voltages and contain equipment that controls and protects the flow of power. Substations include transformers that step down and step up the voltage so power can be transmitted through transmission lines or distributed to your community through distribution lines.

**Transformer** | Transformers step down the voltage in a substation so power can be distributed safely to your community through distribution lines. Transformers also step up the voltage so power can be transmitted through transmission lines.

Let's talk transmission
