Flipi Gas Generation Connection Notice of application filing

Thank you for your ongoing participation in the **Flipi Gas Generation Connection**. We submitted an application for the project to the Alberta Utilities Commission (AUC) on **July 3, 2025**.

Next steps

The AUC will review the application and can approve, approve with conditions or deny the project. The AUC may also host a hearing regarding the project. To learn more about the AUC process and how you can become involved please visit www.auc.ab.ca.

The application

The application can be viewed on the AUC's website at www.auc.ab.ca.

To access the application, scroll down the main page and click on the 'Access here' option under 'Access to the eFiling System' and log in to your eFiling account. If you do not have an account, select 'New personal account' or 'New organization account' and follow the steps on the screen. Please note any questions or concerns regarding account creation and management should be directed towards the AUC at info@auc.ab.ca.

Once your account has been created and you have successfully logged in, enter Filing number **29810** into the 'Go to...' search bar on the top of the page to locate the application.

If you have any issues accessing the application, please contact us at the phone number or email address below and we will mail a copy of the application to you.

Project background

To connect Kiwetinohk's Flipi Gas Generation Project to the grid, AltaLink is proposing changes to its transmission system. The project is located within Clearwater County, approximately three kilometres southwest of the Hamlet of Leedale.

AltaLink is proposing modifications to an existing transmission line, constructing a new switching station and installing underground fibre optic cable to connect Kiwetinohk's generation facility and substation to the grid. AltaLink's proposed project includes:

- constructing a new switching station, called Leedale 1076S
- connecting the switching station to an existing transmission line in the area, called 922L/926L, by modifying the line at the entrance of the switching station,
- constructing five new transmission structures and removing one structure

building two temporary transmission lines, called temporary bypass lines, to ensure a reliable supply of power during construction

- installing underground fibre optic cable to connect the Leedale switching station to another existing transmission line called 1325L; the fibre optic cable will require a new right-of-way

Contact us

We are available to address any questions or concerns you may have. Please contact us at stakeholderrelations@altalink.ca or 1-877-267-1453. Further information about this project and maps are available at <https://www.altalink.ca/project/flipi-gas-generation-connection/>.

Sincerely,

Kris Gladue
