

NOTES

Temporary workspace is required on the existing ROW and private land. Where workspace is on private land, it extends approximately 15 m out from the switching station footprint and access route. Permanent access to the proposed switching station will be developed by the proponent.

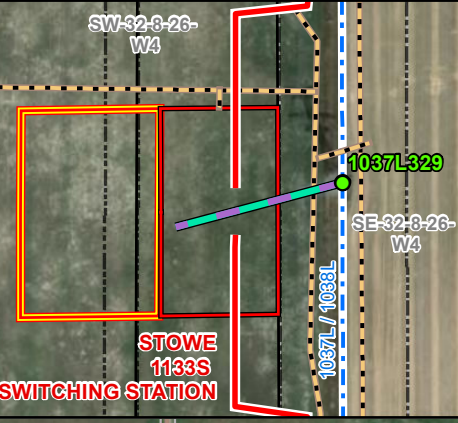

Underground fibre optic cable will be located in the existing and proposed rights-of-way along with the proposed switching station. The location of the buried fibre optic cable shown is approximate.

OPGW will be restrung between the two modified structures shown to accommodate the underground fibre connection.
