Lamoureux Ruby Solar Battery Connection– Project cancellation notification

Thank you for your participation in the Lamoureux Solar STL Inc (Lamoureux Solar) Lamoureux Ruby Solar Battery Connection project. In December 2025, AltaLink began consulting with stakeholders on the proposed project.

This letter is to inform you that on March 9, 2026, Lamoureux Solar requested to cancel their system access service request with the Alberta Electric System Operator (AESO). As a result, AltaLink's related project is no longer required.

If you have questions about Lamoureux Solar's project, please contact them at 780-242-7621 or don@canwestsolar.com.

If you have questions about the cancelled request for system access service, please contact the AESO at 1-888-866-2959 or stakeholder.relations@aeso.ca.

Project background

To connect their proposed solar battery project to the grid, Lamoureux Solar had planned to construct a new substation, that would have been named Ruby 1095S.

AltaLink proposed changes to its system to accommodate the connection of Lamoureux's Ruby Solar Battery project, including:

- constructing approximately seven km of new 138 kilovolt (kV) transmission line (to be called 325L) along one of three potential routes from Lamoureux's Ruby 1095S substation to AltaLink's existing Lamoureux 71S substation
- installing a new circuit breaker and associated equipment within the Lamoureux 71S substation
- installing optical grounding wire (OPGW) between the Ruby 1095S substation and Lamoureux 71S substation

Contact us

We are available to address any questions or concerns you may have. Please contact us at stakeholderrelations@altalink.ca or 1-877-267-1453. You can also view more information about the project at <http://www.altalink.ca/projects>.

Sincerely,

Kris Gladue
Manager, Stakeholder Engagement
