Legal Solar Battery Connection – Project cancellation notification

Thank you for your participation in the Legal Solar STL Inc.'s (Legal Solar) Legal Solar Battery Connection project. In January 2026, AltaLink began consulting with stakeholders on the proposed project.

This letter is to inform you that on March 2, 2026, Legal Solar requested to cancel their system access service request with the Alberta Electric System Operator (AESO). As a result, AltaLink's related project is no longer required.

If you have questions about Legal Solar's project, please contact them at 780-242-7621 or don@canwestsolar.com.

If you have questions about the cancelled request for system access service, please contact the AESO at 1-888-866-2959 or stakeholder.relations@aeso.ca.

Project background

To connect the Legal Solar Battery project to the grid, AltaLink had proposed to work in two separate locations: near Legal Solar's previously proposed new substation (called Legal 1068S), and at AltaLink's existing NW Cardiff 191S Substation.

AltaLink had proposed to construct a new 138 kilovolt transmission line connecting to its existing 792L transmission line and install two new telecommunications towers.

Contact us

We are available to address any questions or concerns you may have. Please contact us at stakeholderrelations@altalink.ca or 1-877-267-1453. You can also view more information about the project at <http://www.altalink.ca/projects>.

Sincerely,

Kris Gladue
Manager, Stakeholder Engagement
